USER MANUAL

Service Advisor

Receive the customer, open the job card, raise and send the estimate, record the decision and hand the car back.

- Step 1 · Customer classification
- Step 2 · Vehicle information & issue
- Step 3 · Job card opened
- Step 4 · Inspection & pricing
- Step 5 · Estimate to customer
- Step 6 · Customer decision & work
- Step 7 · Quality check, pickup & closure

Your role at a glance

You are the customer's single point of contact. You open the job card when the car arrives (Steps 1–3), raise the estimate and price the labour (Step 4), send it once the Store has priced the parts and — for external customers — the Supervisor has approved it (Step 5), record the customer's decision (Step 6), and finally call the customer, take payment, issue the gate pass and close the job (Step 7).

Where you fit in the job card workflow

1	2	3	4	5	6	7

3 Open a job card
4 The job card after it is opened
5 Raise the estimate
6 Approval and sending
7 The customer's decision
8 Pickup, payment, gate pass, closing
9 Quick reference

1. Signing in

1. Open the workshop system in your browser (Chrome, Edge or Safari).
2. Type your **username or e-mail** and your **password**, then press **Sign In**.
3. The system opens your dashboard. Your role — **Service Advisor** — is shown at the top right.

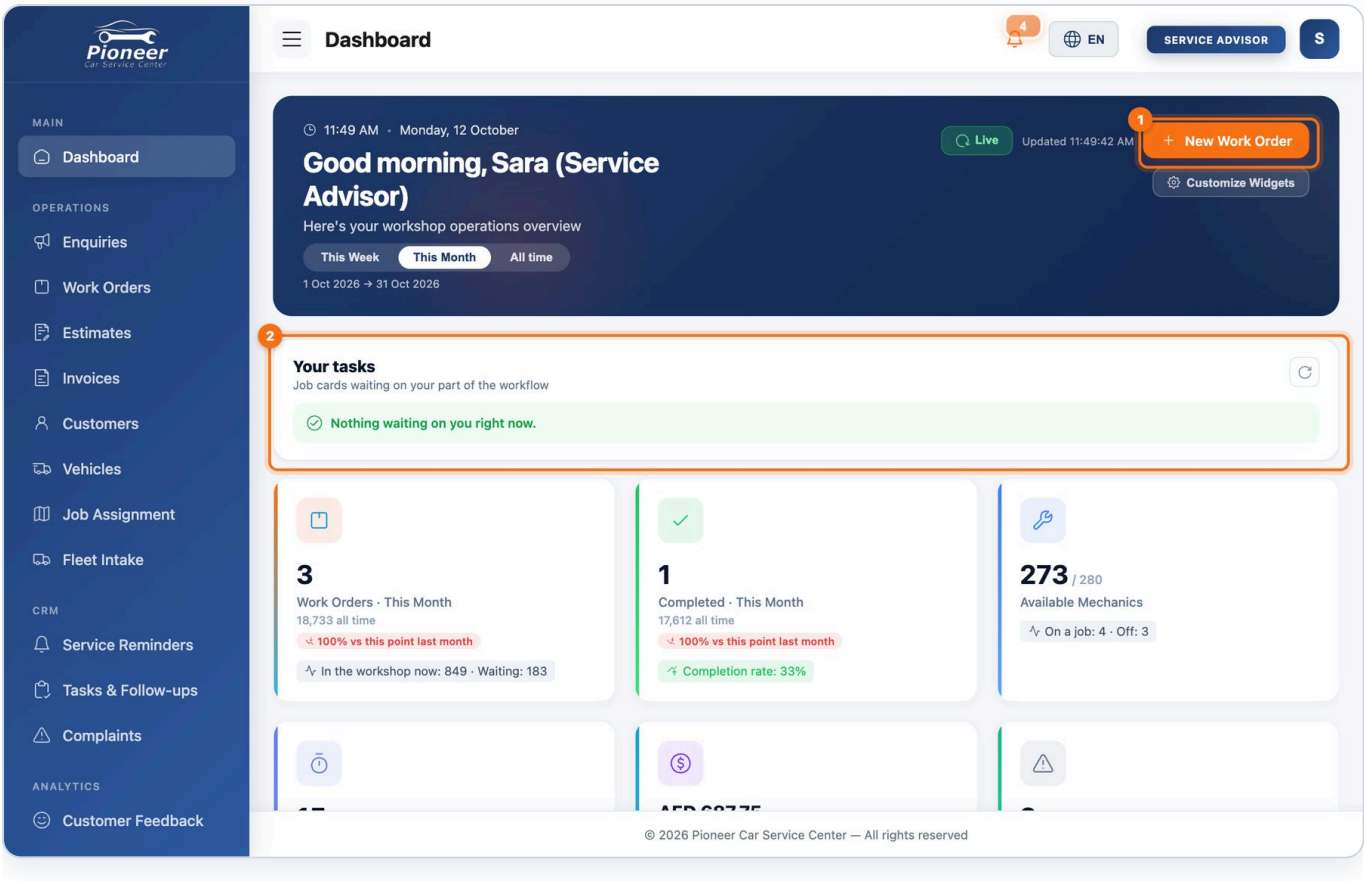

The sign-in page: (1) username or e-mail, (2) password, (3) Sign In.

TIP Use the **EN** button at the top of any page to switch language (Arabic and 10 others). Your choice is remembered on this device.

NOTE Your account is created by the Workshop Manager. Forgot your password? Use **FORGOT PASSWORD?** on the sign-in page or ask the manager to reset it.

2. Your dashboard

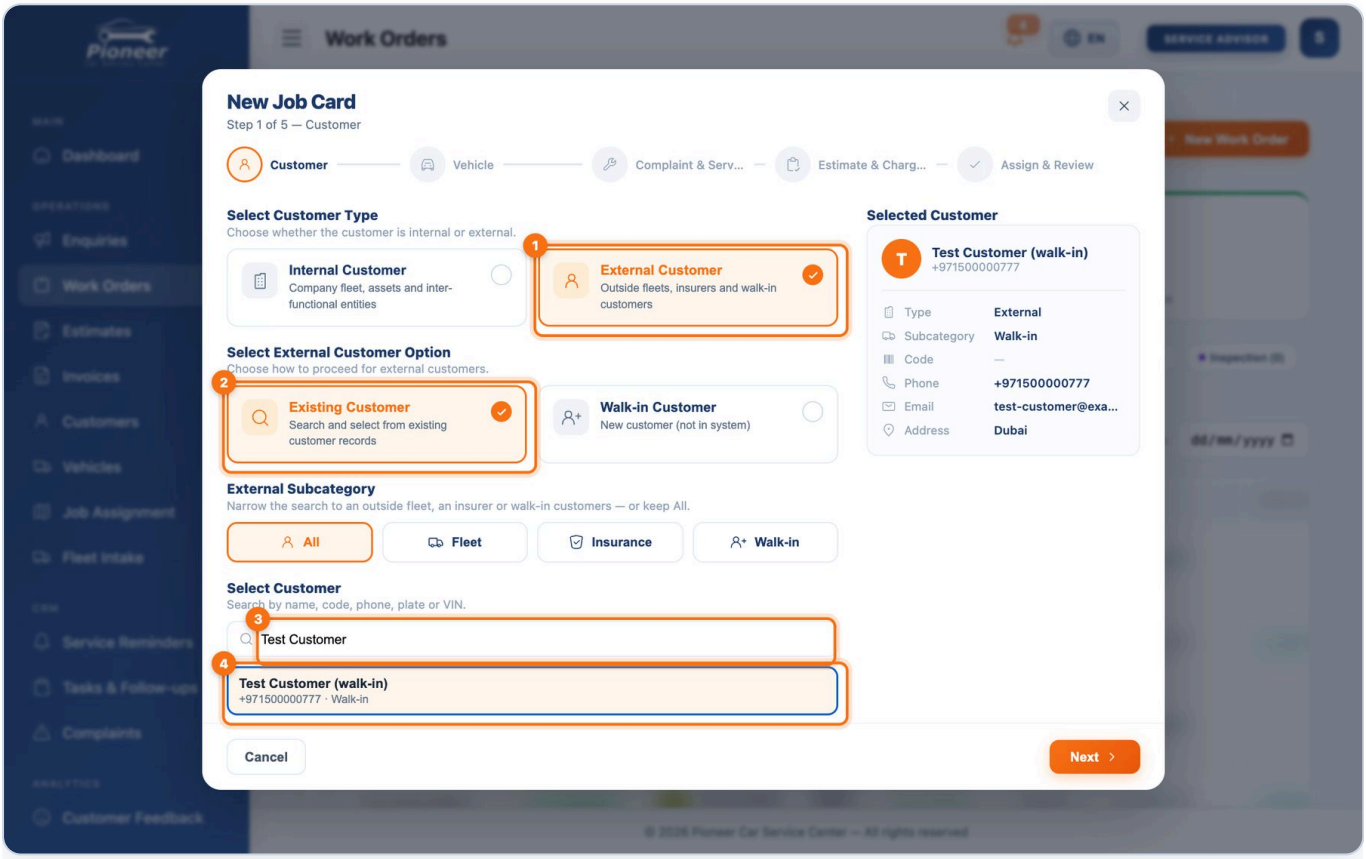

(1) New Work Order opens a job card. (2) Your tasks — what is waiting on you.

The **Your tasks** card on your dashboard lists the job cards waiting on you as Service Advisor: estimates to raise or send, decisions to record and cars ready for delivery. Click any line to open it. The list refreshes every minute; the bell at the top shows new notifications as they arrive.

3. Open a job card STEPS 1–3

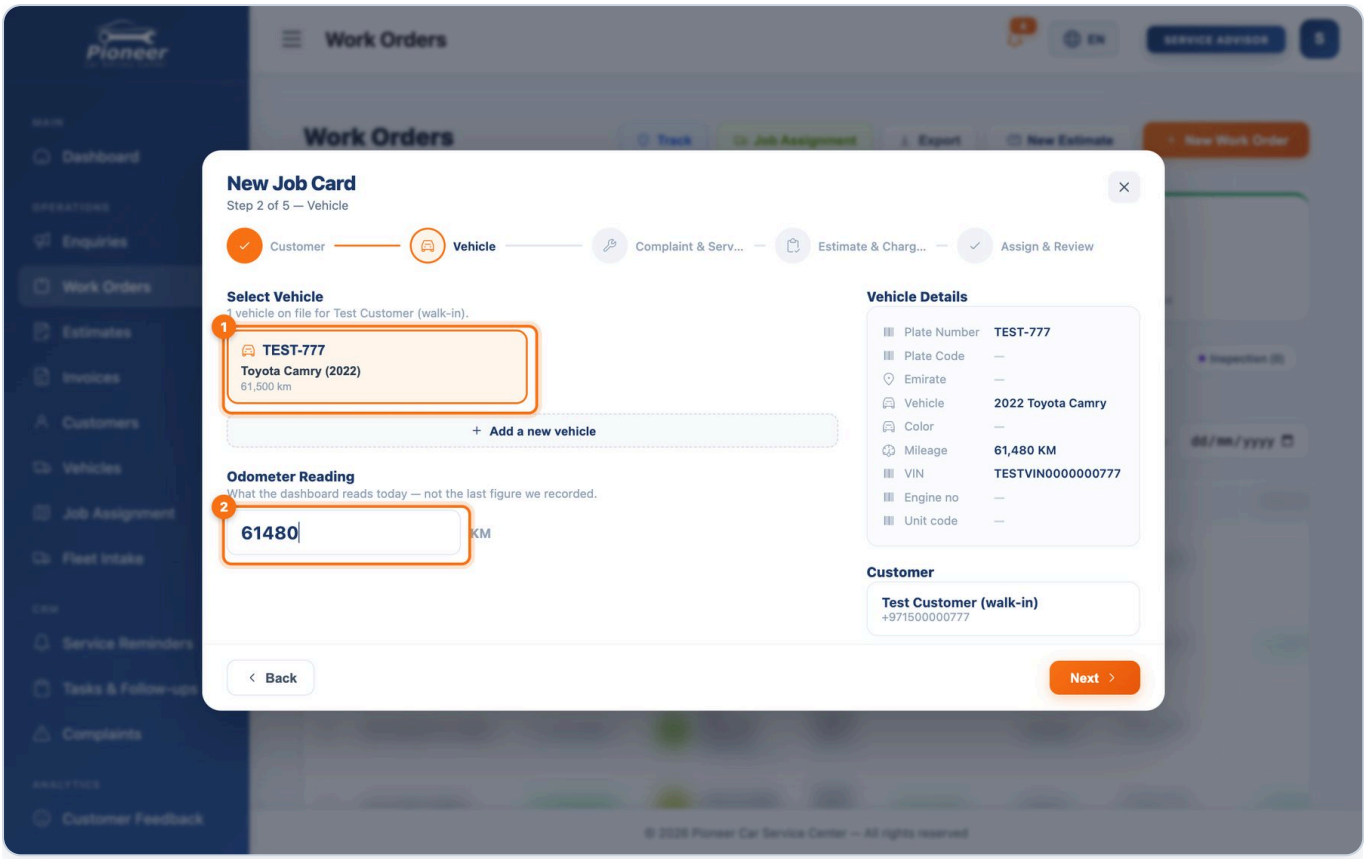

When the customer arrives, open a new job card. The wizard has five short pages. Fields marked * are required.

1. Click **New Work Order** on the dashboard (or on the Work Orders page).
2. **Customer (Step 1).** Choose **External** or **Internal** customer. For an existing customer choose **Existing Customer** and search by name, phone, plate or VIN; for a new walk-in choose **Walk-in Customer** and type the name and mobile number. The customer's classification (external / internal and subcategory) decides whether the estimate needs Supervisor approval later.

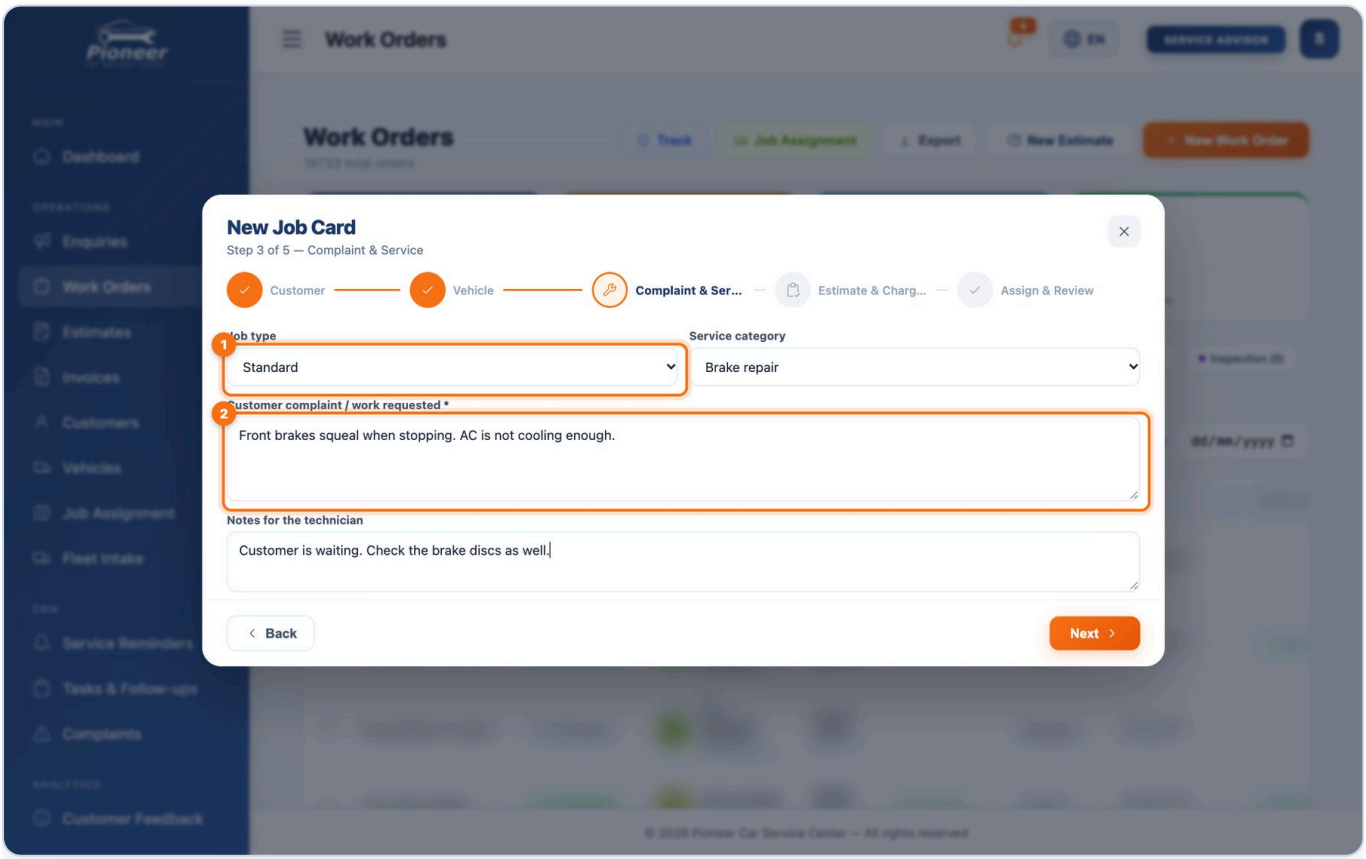

Page 1 — customer type, option, search and the selected customer.

3. **Vehicle (Step 2).** Pick the vehicle (or **Add a new vehicle**) and type the **odometer reading** shown on the dashboard today.

Page 2 — (1) the vehicle, (2) today's odometer reading.

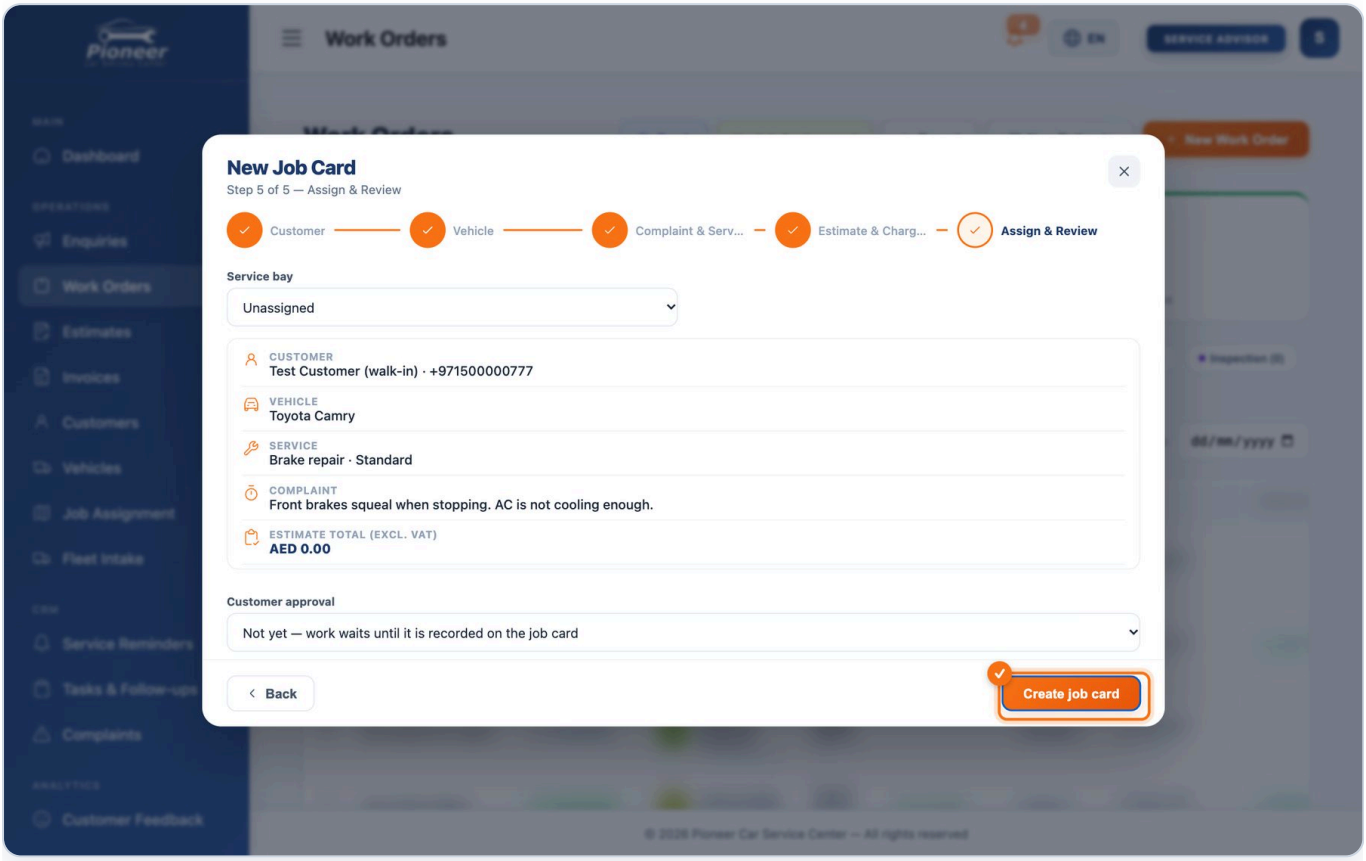

4 **Complaint & service.** Choose the service category and write the customer's complaint in their words. Add notes for the technician if needed.

Page 3 — service category and the customer's complaint.

5 **Estimate & charges.** Leave this empty for normal jobs — the estimate is raised in Step 4 after inspection. Use it only for simple jobs priced at the counter.

6 **Assign & review.** Check the summary and press **Create job card**. Technicians are assigned later by the Team Leader.

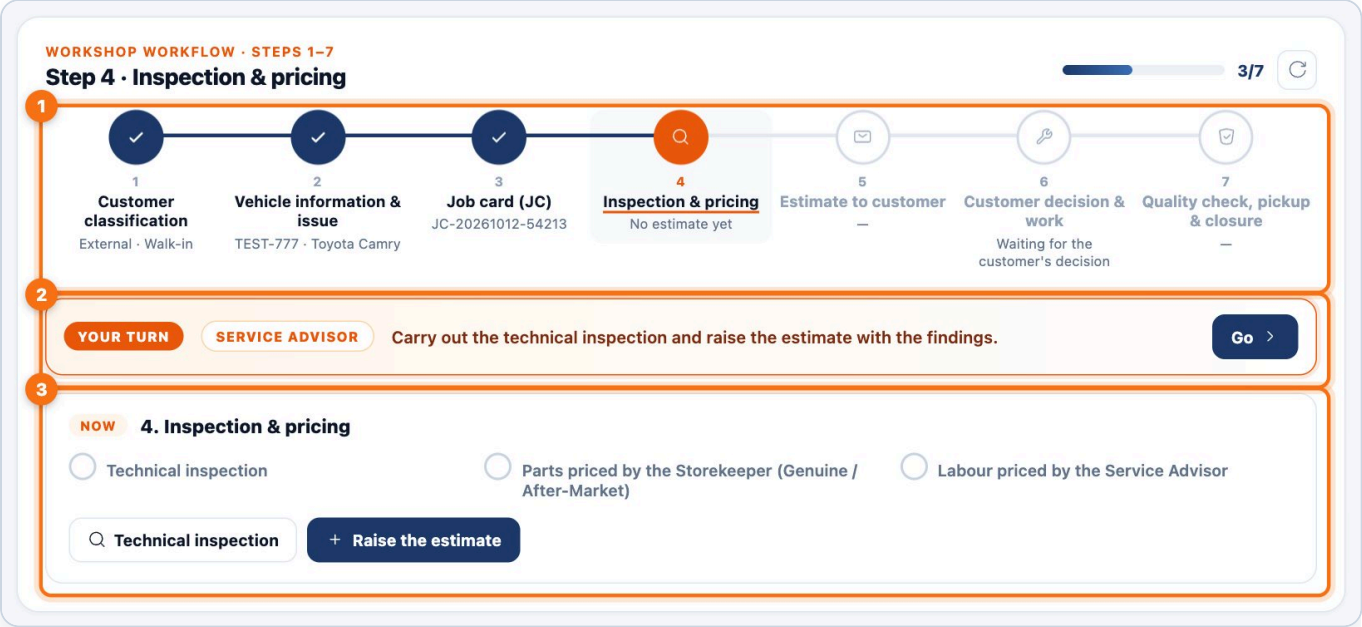

Page 5 — review, then Create job card.

THE SYSTEM CHECKS

Creating the job card automatically opens the **MAIN JOB CARD (JC)** — Step 3 — and notifies the Supervisor and Team Leader that a new request was raised.

4. The job card after it is opened

Steps 1–3 are done; the panel shows Step 4 is next and that it is your turn.

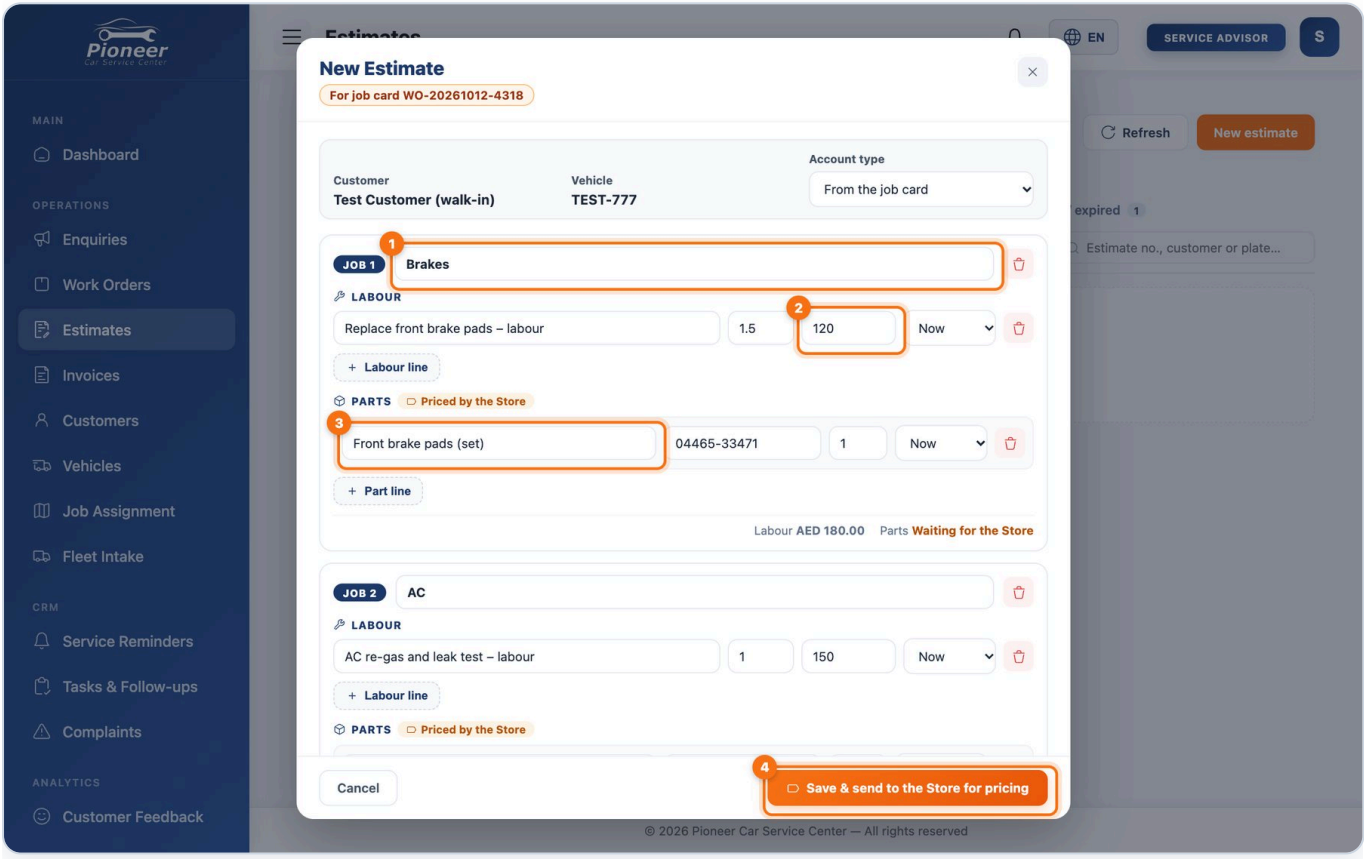

Every job card (work order) has a **Workshop workflow** panel at the top. It shows the seven steps, which are done, which one is current and **who acts next**. When the next action is yours, the panel says **Your turn** and the buttons you need are shown. Buttons for other roles' steps are hidden — the system also refuses them if someone tries.

- Click any step in the strip to see its checklist and details.
- **Go** jumps to the step where the next action is.
- The refresh button reloads the panel; it also updates by itself when others act.

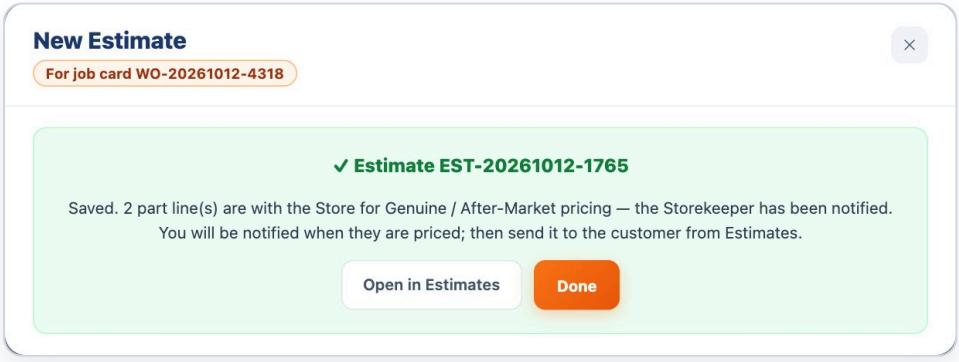

5. Raise the estimate STEP 4

After the technical inspection, raise the estimate from the job card. Group the work into **jobs** (for example "Brakes" and "AC"), each with its labour and parts lines.

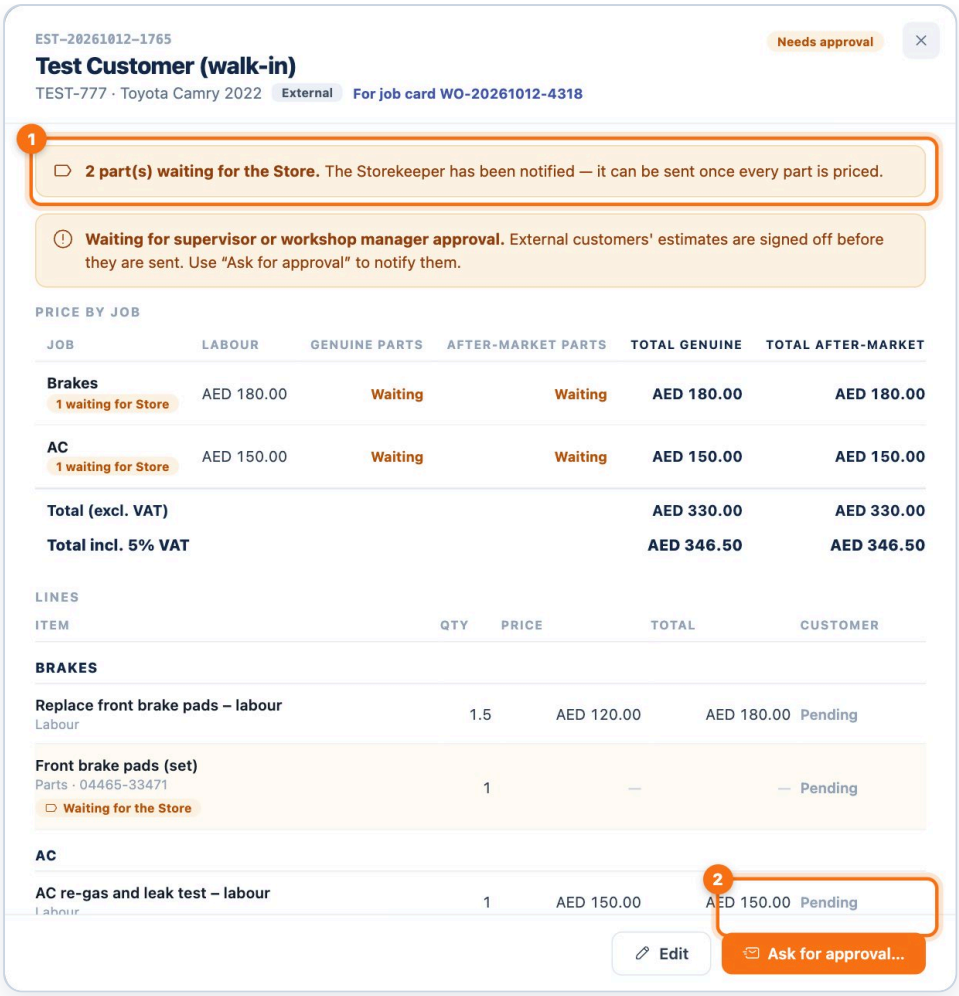

1. On the job card, open Step 4 and click **Raise the estimate**.
2. For each job type a **job name**, then add a **Labour line** (description, hours, price) and a **Part line** for every part (description, part number, quantity).
3. **Price the labour** — that is your part. **Leave part prices empty**: the Store prices them with a Genuine and an After-Market price.
4. Press **Save & send to the Store for pricing**. The Storekeeper is notified.

New Estimate — (1) job name, (2) labour price, (3) part line without price, (4) send to the Store.

Saved — the Storekeeper has been notified.

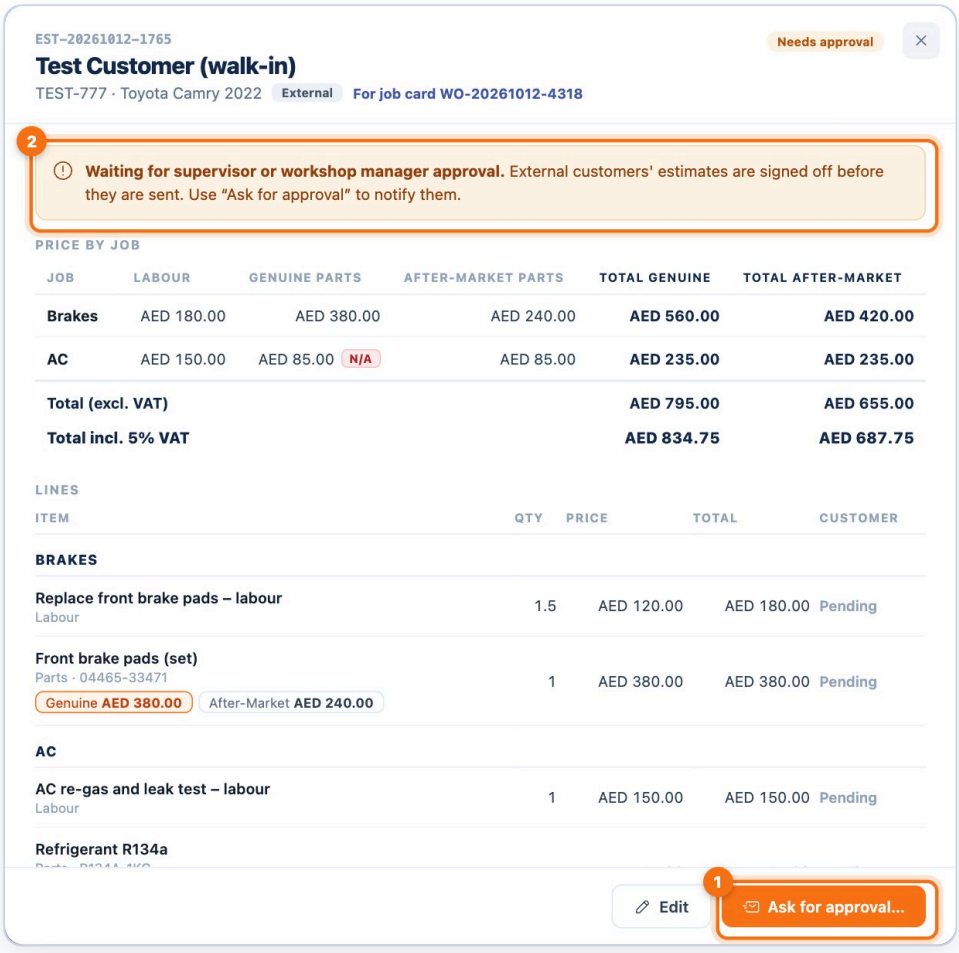

The estimate waits for the Store to price the parts (1). External customers also need approval (2).

THE SYSTEM CHECKS An estimate cannot be sent while any part is unpriced or any labour line has no price.

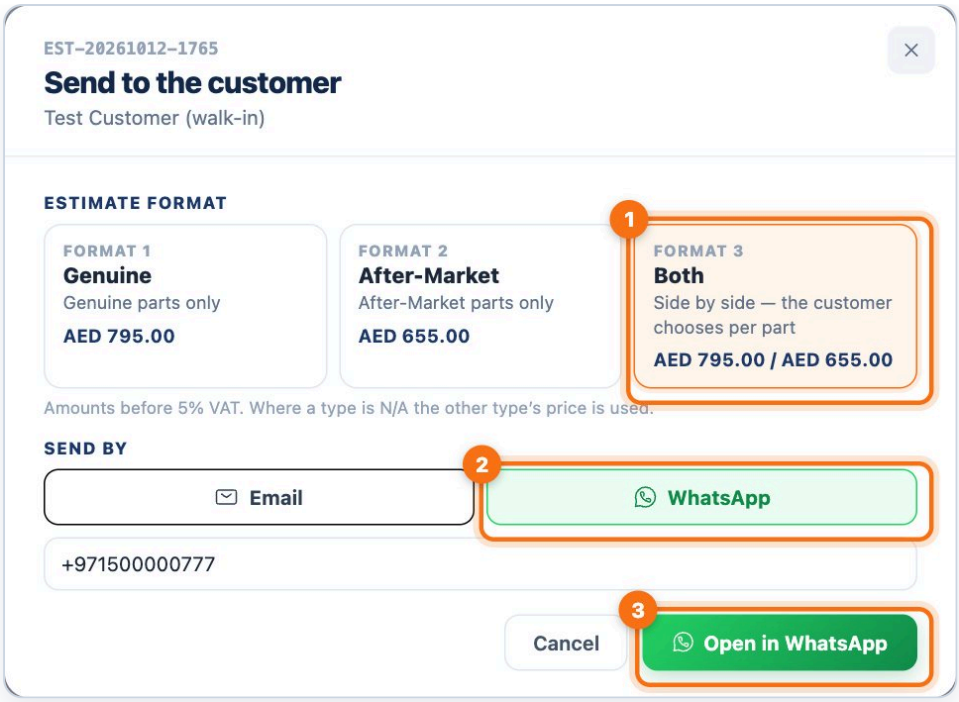

6. Approval and sending STEP 5

When the Store has priced every part you receive a **Parts priced** notification. Open the estimate from **Your tasks** or the notification.

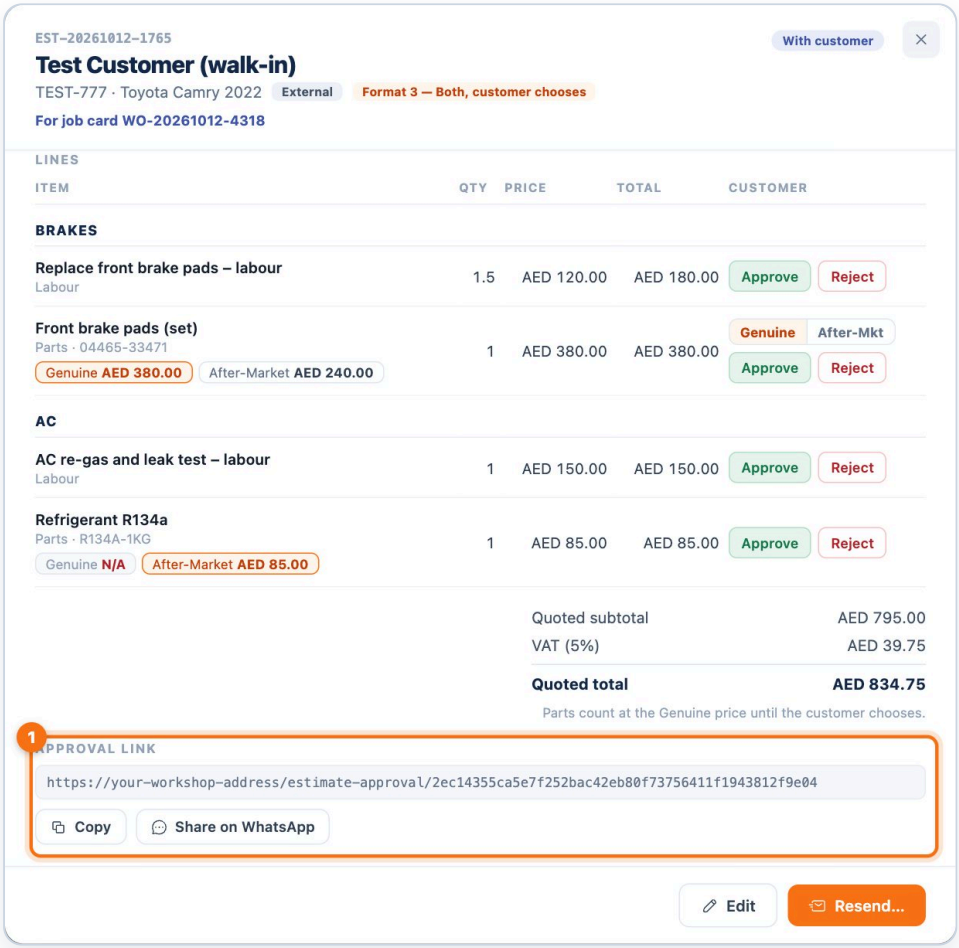

1. **External customers:** the estimate must be approved by a Supervisor (or the Workshop Manager) first. Press **Ask for approval…** — the Supervisor is notified. Internal customers skip this.
2. Once approved (you are notified), press **Send to customer…**.
3. Choose the **format**: **Format 1 — Genuine**, **Format 2 — After-Market** or **Format 3 — Both** (side by side, the customer chooses per part).
4. Choose **E-mail** or **WhatsApp** and send. With WhatsApp the message opens ready — press Send in WhatsApp.

Priced estimate for an external customer — Ask for approval.

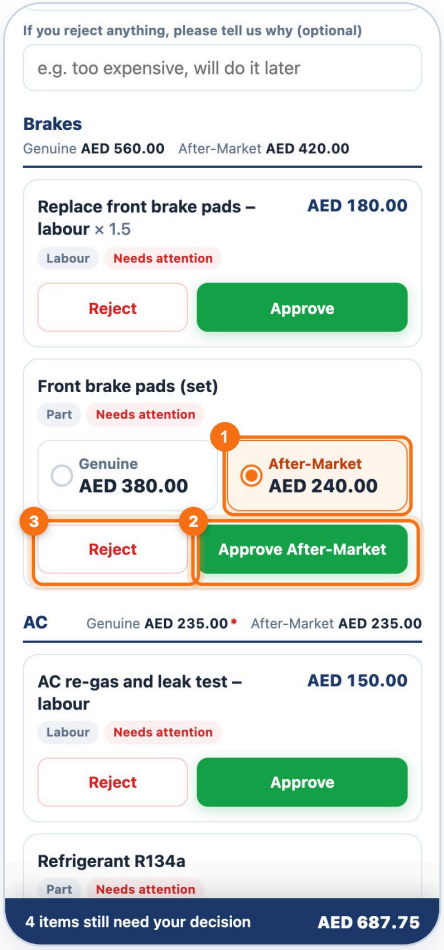

Send to the customer — (1) Format 3 · Both, (2) WhatsApp, (3) send.

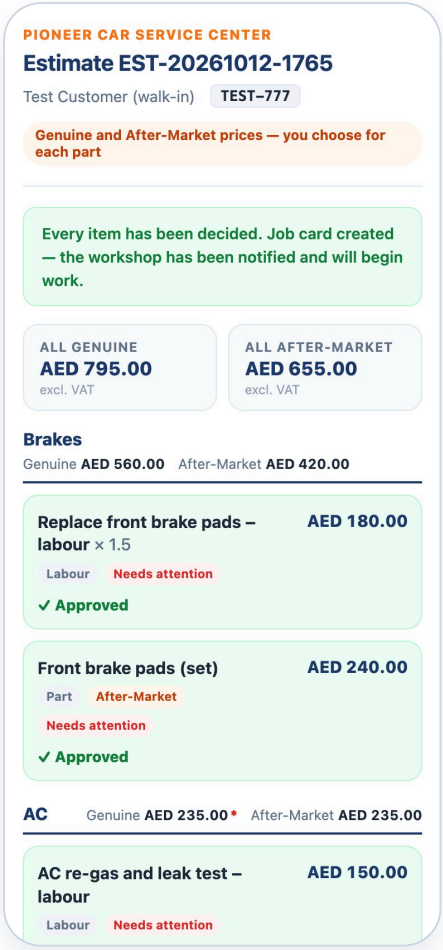

Sent — the approval link (1) can be copied or shared again at any time; Resend sends it again.

7. The customer's decision STEP 6

The customer opens the link on their phone and approves or rejects **each line**; with Format 3 they also choose Genuine or After-Market for each part. No login is needed.

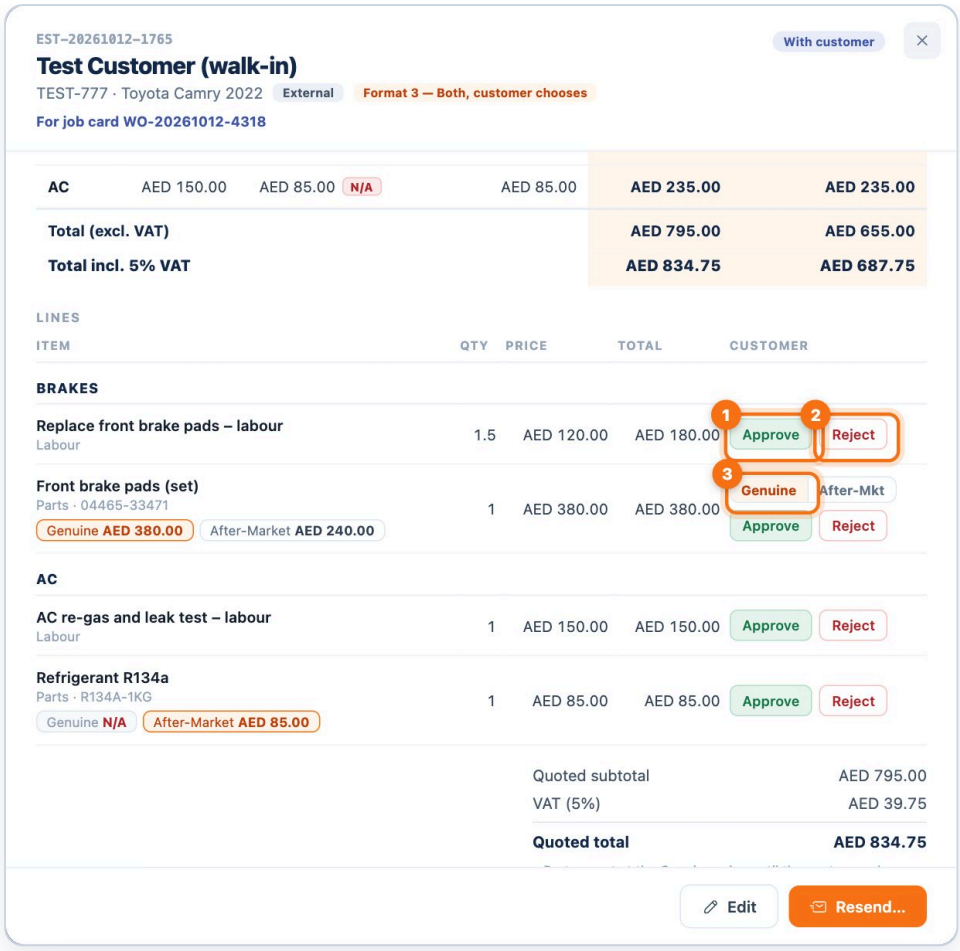

What the customer sees.

After the customer has decided.

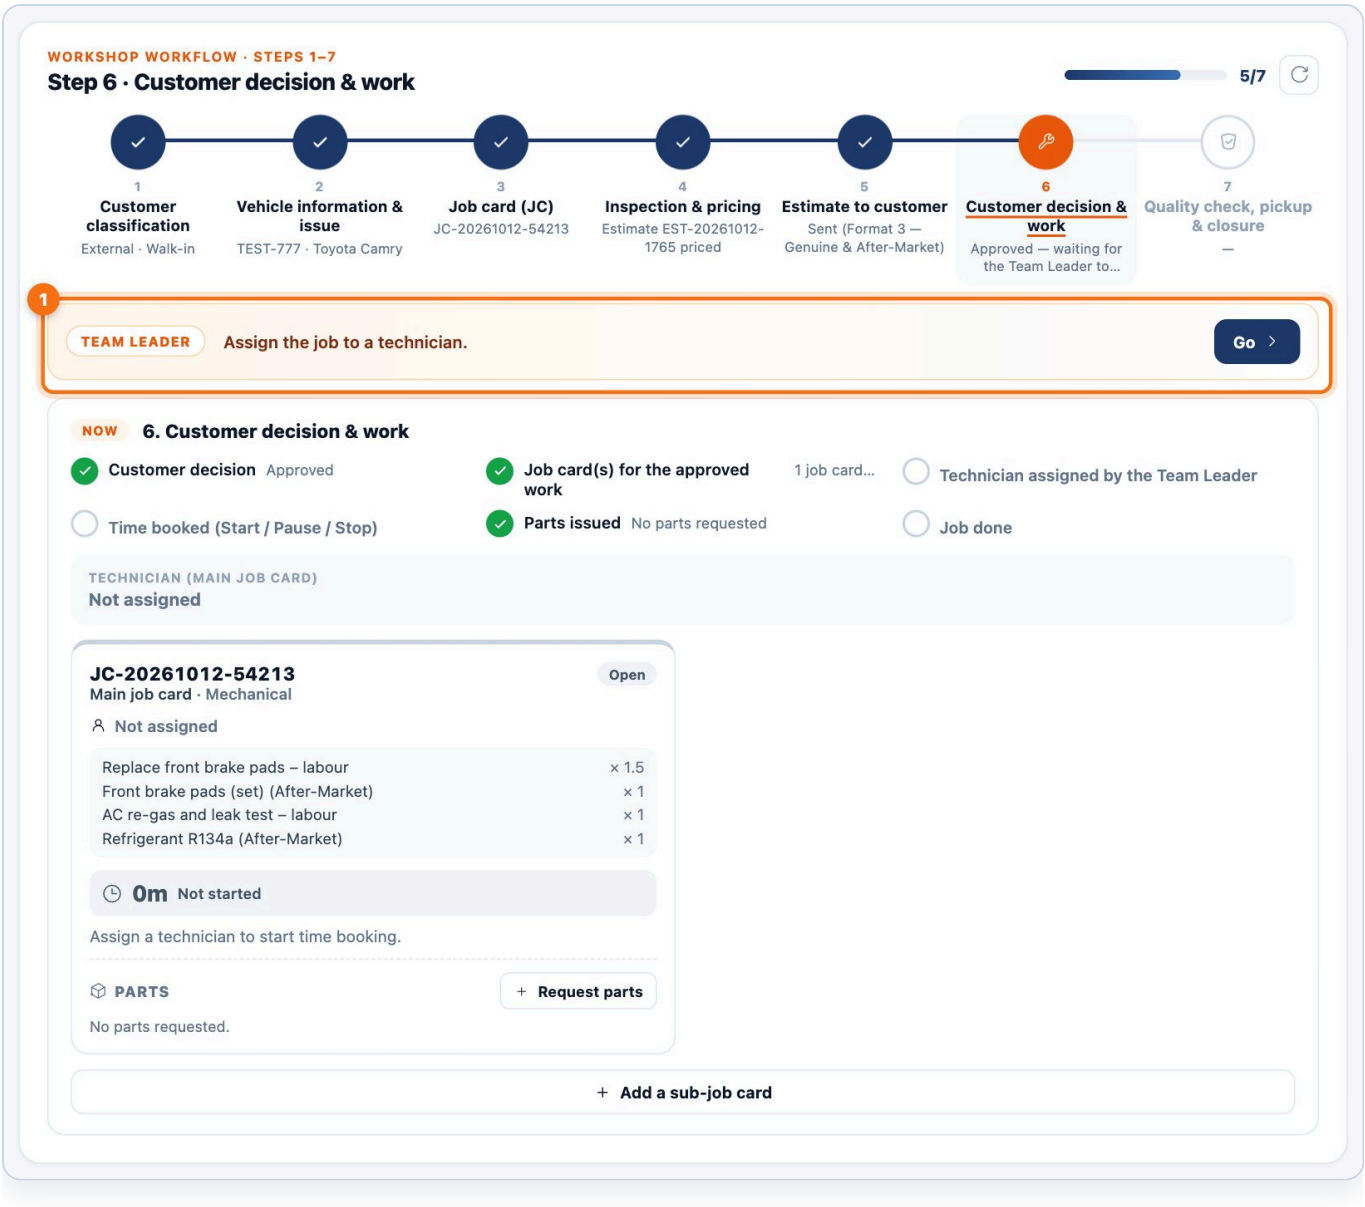

In person or by phone: open the estimate and use the approve / reject buttons on each line yourself.

Recording the decision at the counter — (3) Genuine or After-Market, then (1) Approve or (2) Reject each line.

THE SYSTEM CHECKS

When every line is decided, the approved work moves onto the job card automatically. If only some lines were approved, press **Open job card** to continue with the approved part. If the customer rejects everything, the job is closed without work.

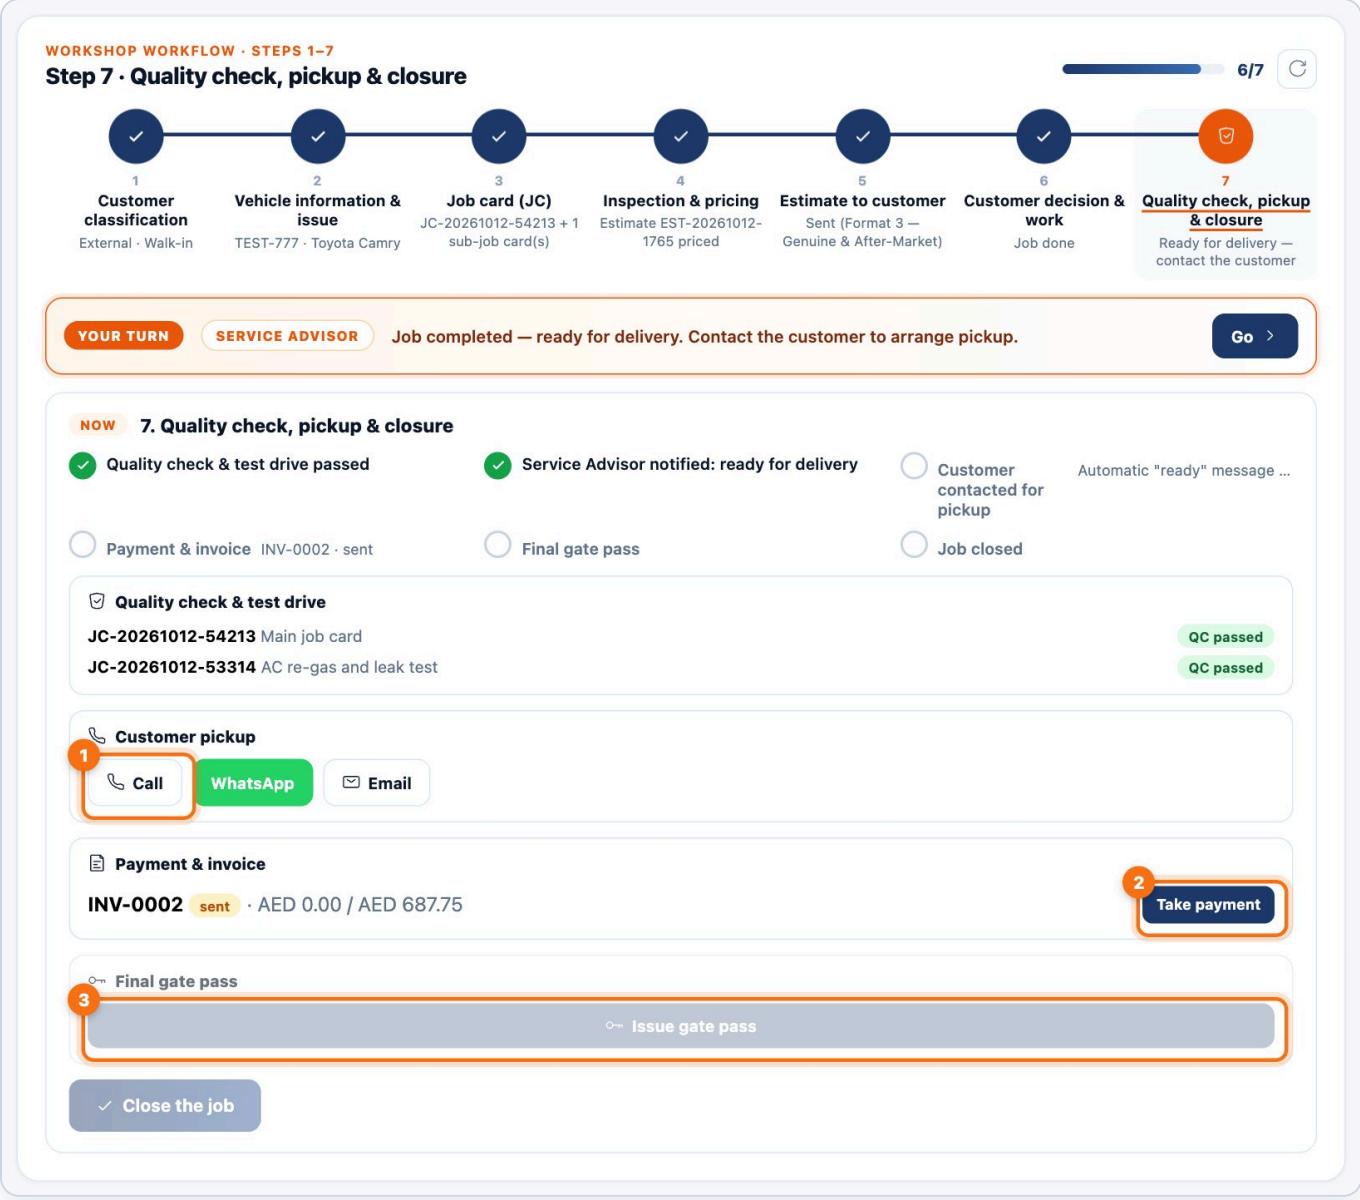

Step 6 on the job card: approved work is waiting for the Team Leader to assign a technician.

8. Pickup, payment, gate pass, closing STEP 7

When the Supervisor passes the quality check you receive **Job completed — ready for delivery**, and the job appears under **Ready for delivery** in Your tasks.

Your tasks — the car is ready for delivery.

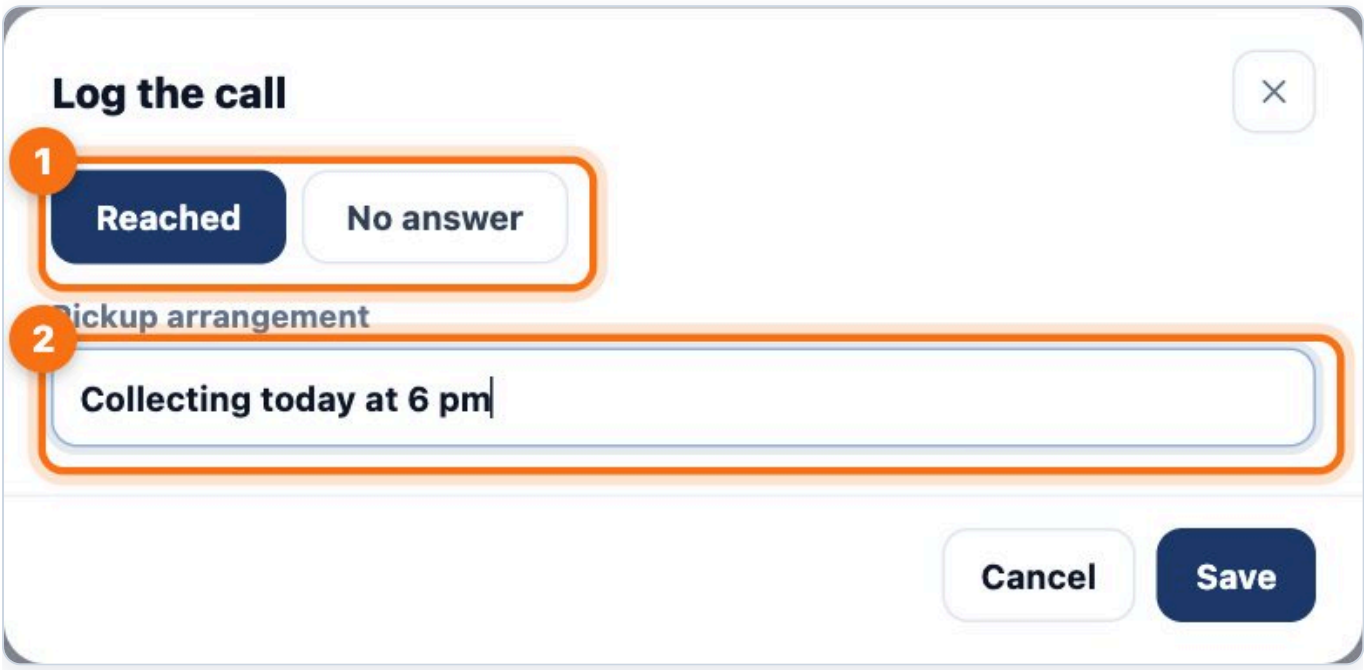

Step 7 on the job card: (1) contact the customer, (2) take payment, (3) gate pass.

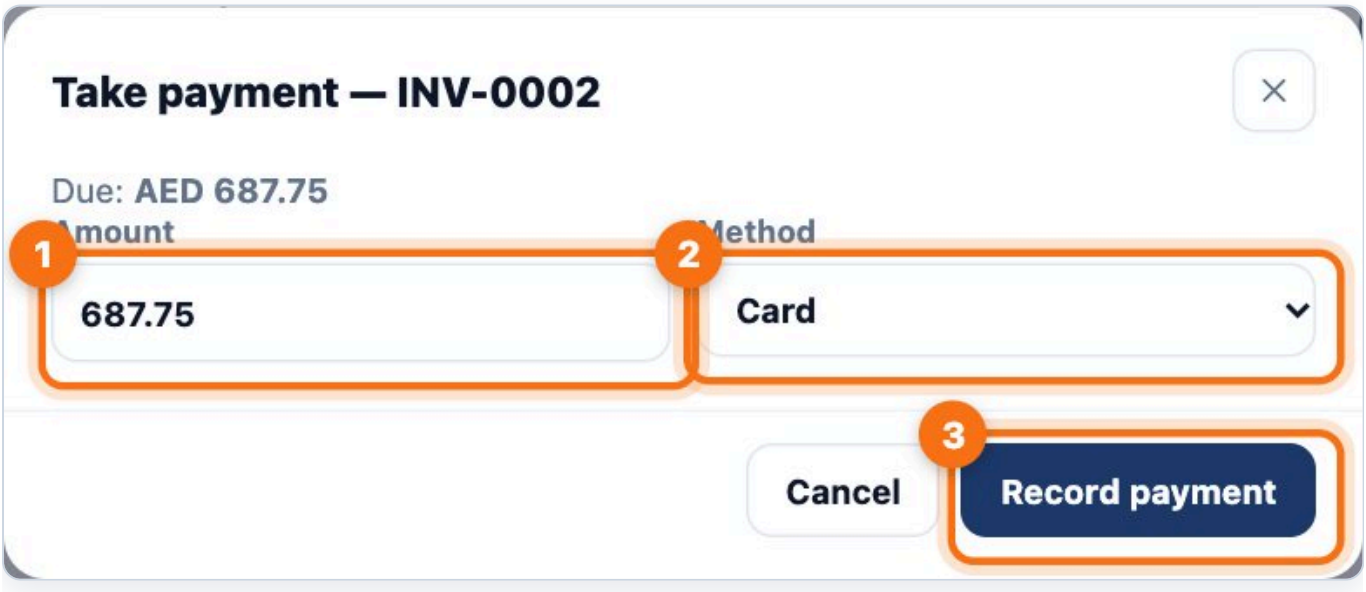

1. **Contact the customer.** In Step 7 press **Call** (on a phone it dials) and log the outcome — reached or no answer — and the pickup arrangement. **WhatsApp** and **Email** send the "ready for collection"

message and log the contact by themselves.

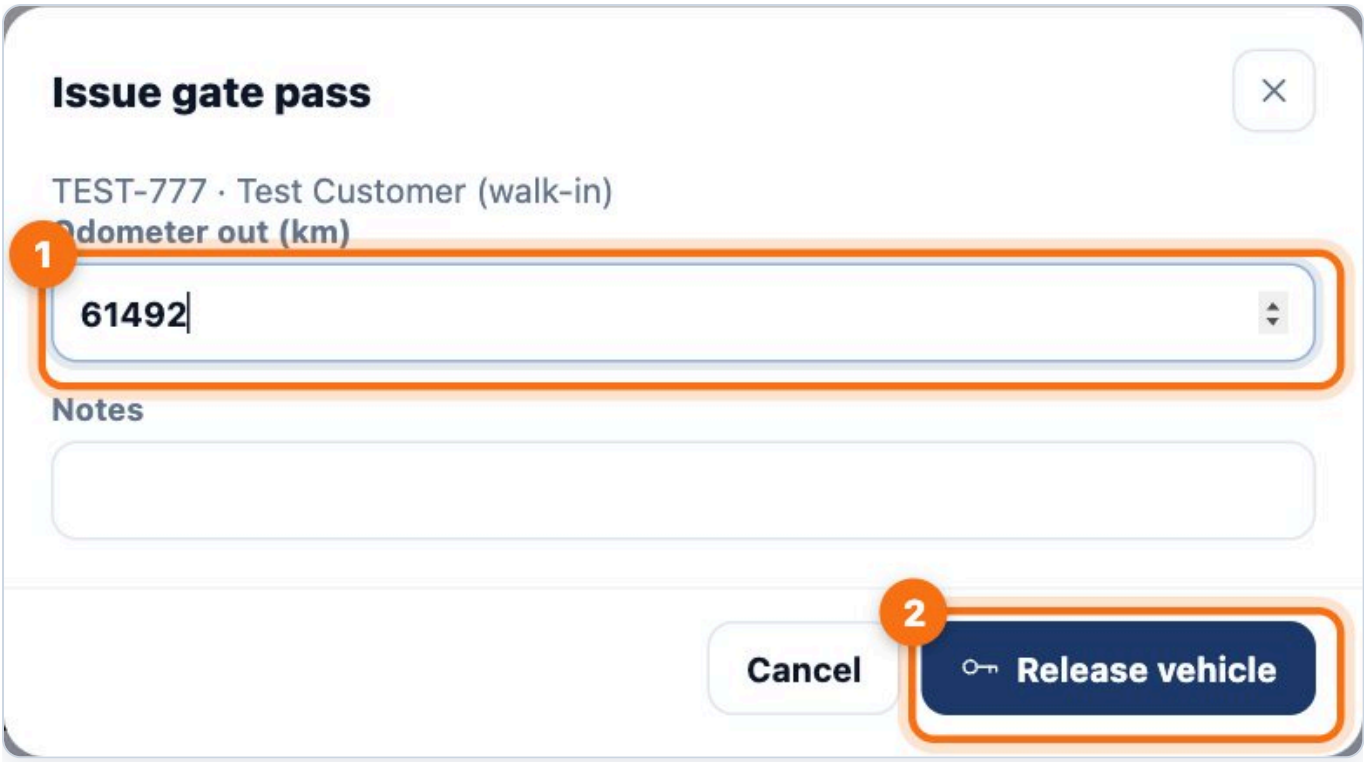

2. **Take payment.** The invoice is raised automatically. Press **Take payment**, choose cash, card or bank transfer and record it. Internal / credit customers are billed on account.
3. **Issue the gate pass.** Press **Issue gate pass**, enter the odometer reading out and **Release vehicle**. Print it for the gate.
4. **Close the job.** Press **Close the job** when the vehicle has left.

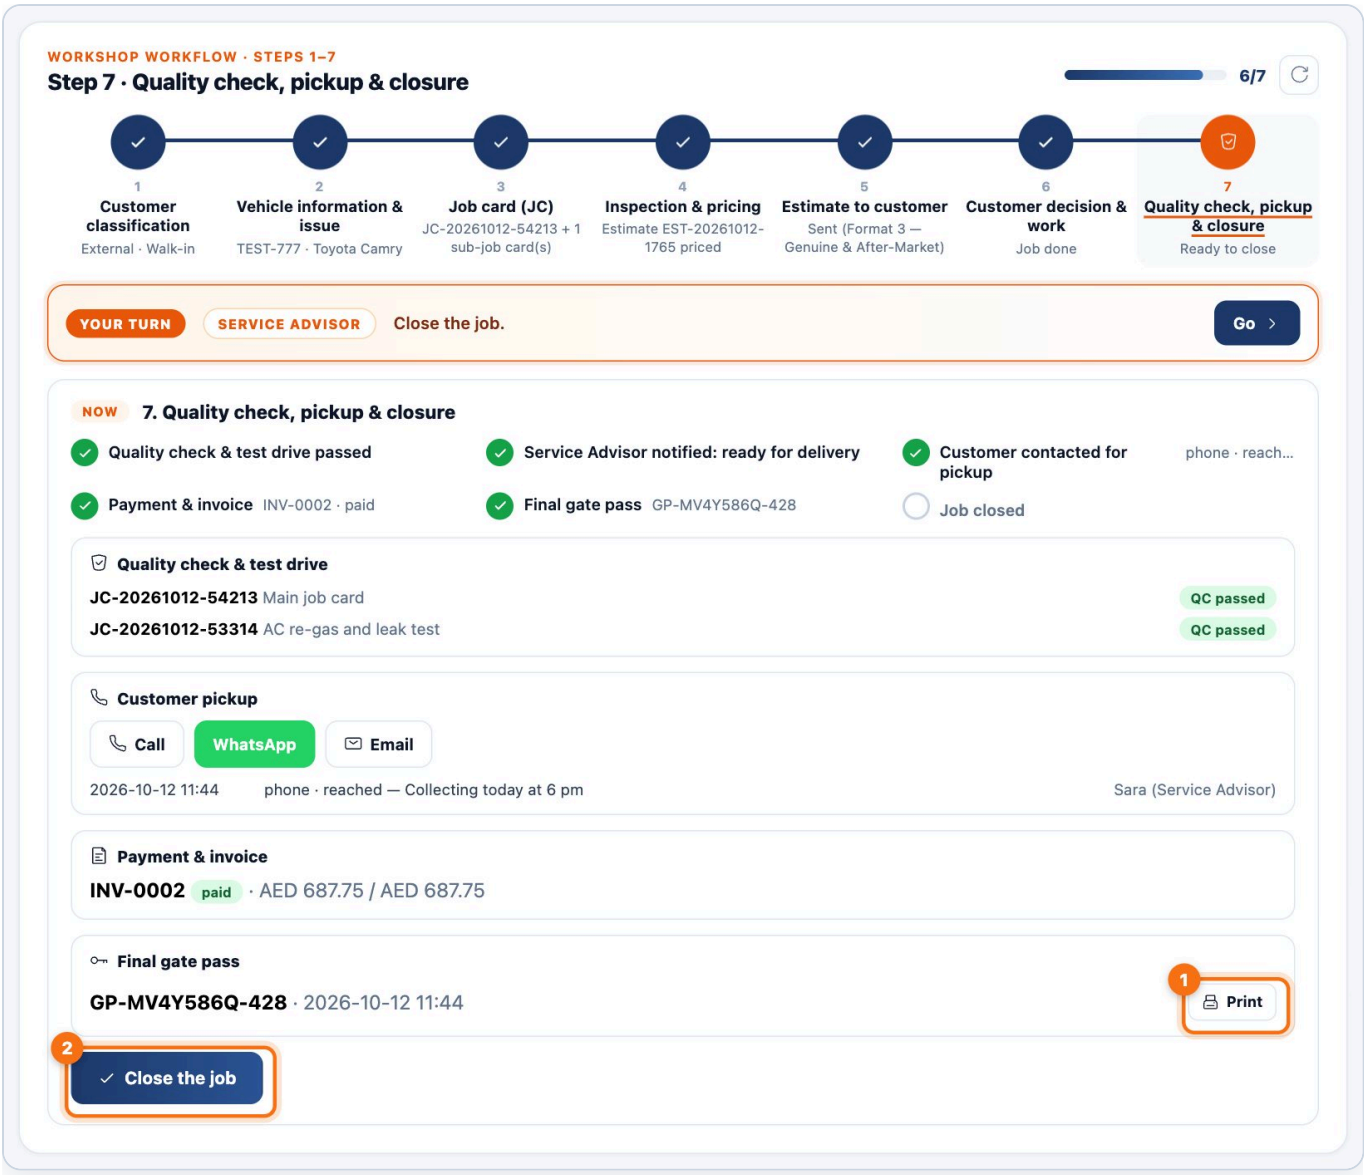

Logging the pickup call.

Recording the payment.

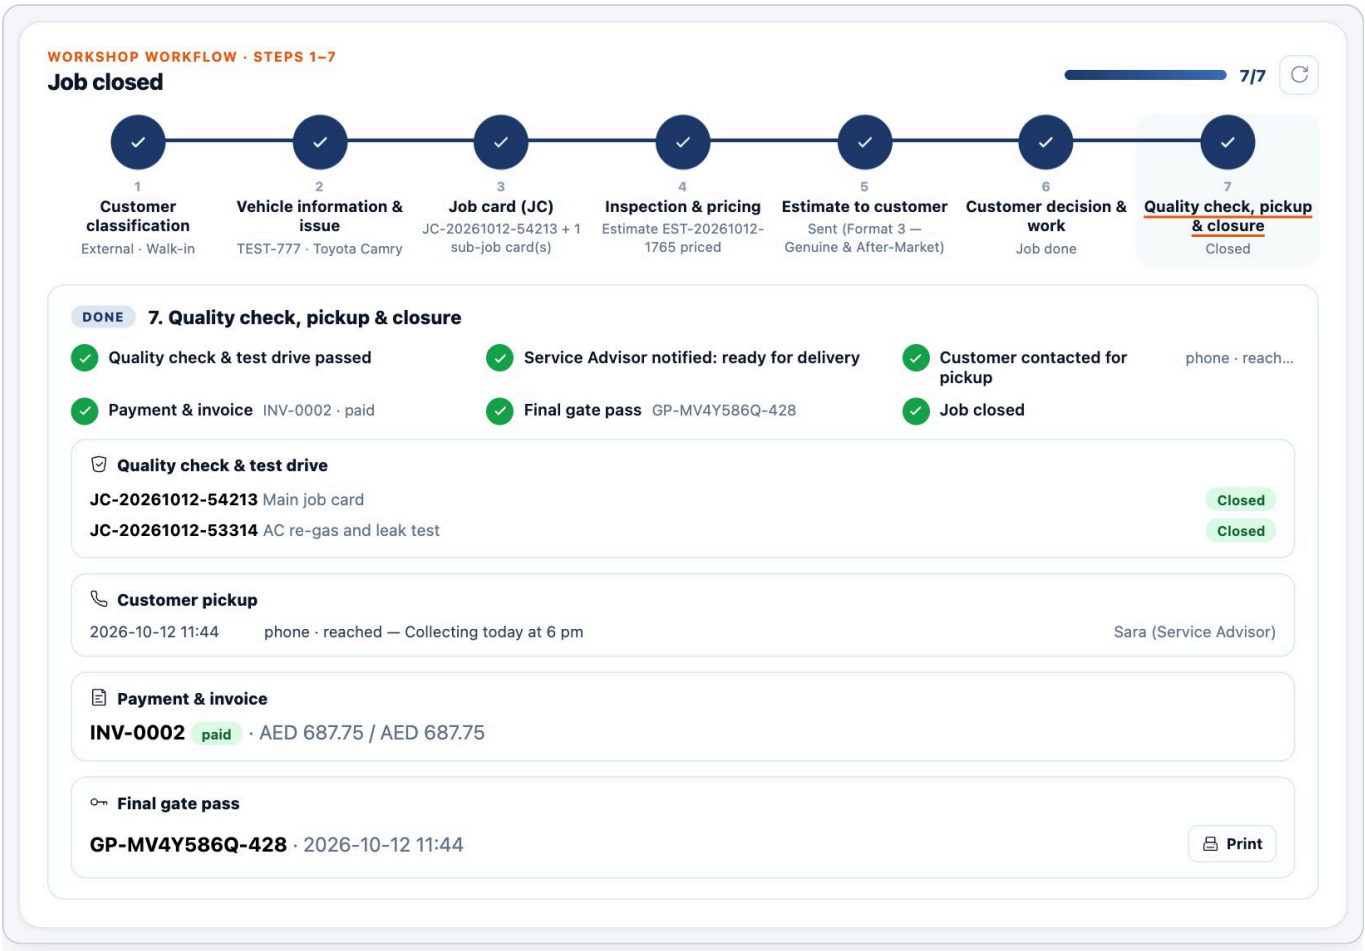

The final gate pass — odometer out, then Release vehicle.

Gate pass issued: (1) print it for the gate, (2) close the job.

THE SYSTEM CHECKS

The gate pass is refused until the quality check has passed **AND** the invoice is paid (or billed on account). The job cannot be closed without the gate pass.

All seven steps done — the job is closed.

9. Quick reference

You want to…	Where	Button

USER MANUAL

Storekeeper / Part Advisor

Price estimate parts (Genuine and After-Market), check the shelf, issue parts to job cards and keep the floor informed when parts are late.

Step 5 · Estimate to customer

Step 6 · Customer decision & work

Your role at a glance

You own the parts. In **Step 5** the Service Advisor sends you the estimate: you give every part line a **Genuine** and an **After-Market** price (or mark one N/A). In **Step 6**, when a technician requests parts on a job card, you check the shelf and either **issue** the part or mark it **not available** with the date you expect it. The same applies to the Part Advisor role.

Where you fit in the job card workflow

1	2	3	4	5	6	7
Customer classification	**Vehicle information & issue**	**Job card opened**	**Inspection & pricing**	**Estimate to customer**	**Customer decision & work**	**Quality check, pickup & closure**
Service Advisor	Service Advisor	System · Service Advisor	Service Advisor · Technician	Store · Supervisor · Service Advisor	Customer · Team Leader · Technician · Store	Supervisor · Service Advisor

What the system lets you do

Step 5 Price parts — Genuine / After-Market / N/A

Step 6 Check the shelf, issue parts, record expected dates

NOTE Labour is priced by the Service Advisor, not by the Store. You only see and price the part lines.

In this manual

1 Signing in

2 Your dashboard and the Store screen

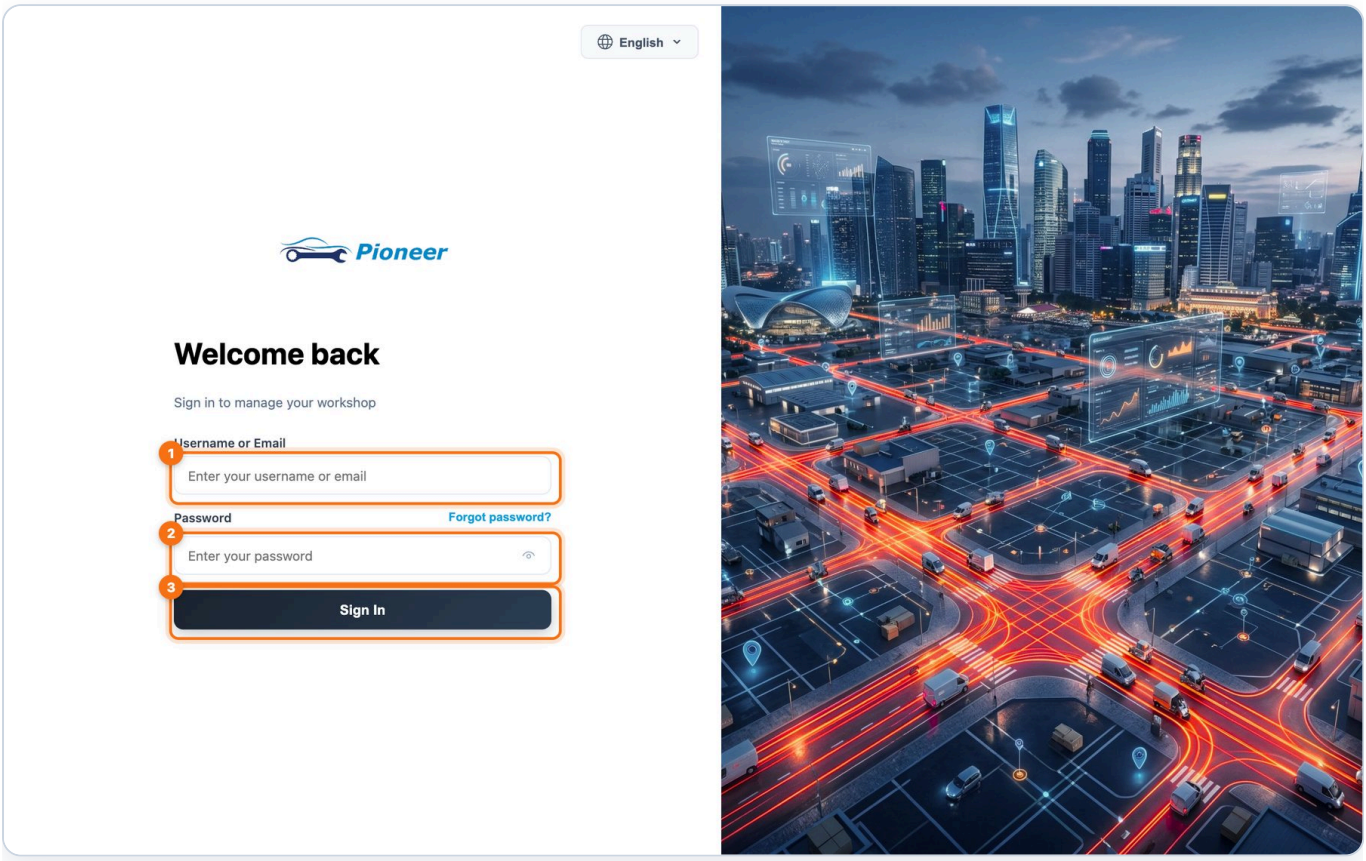

3 Price the parts on an estimate

4 Requisitions from the floor

5 Quick reference

1. Signing in

1. Open the workshop system in your browser (Chrome, Edge or Safari).
2. Type your **username or e-mail** and your **password**, then press **Sign In**.
3. The system opens your dashboard. Your role — **Storekeeper** — is shown at the top right.

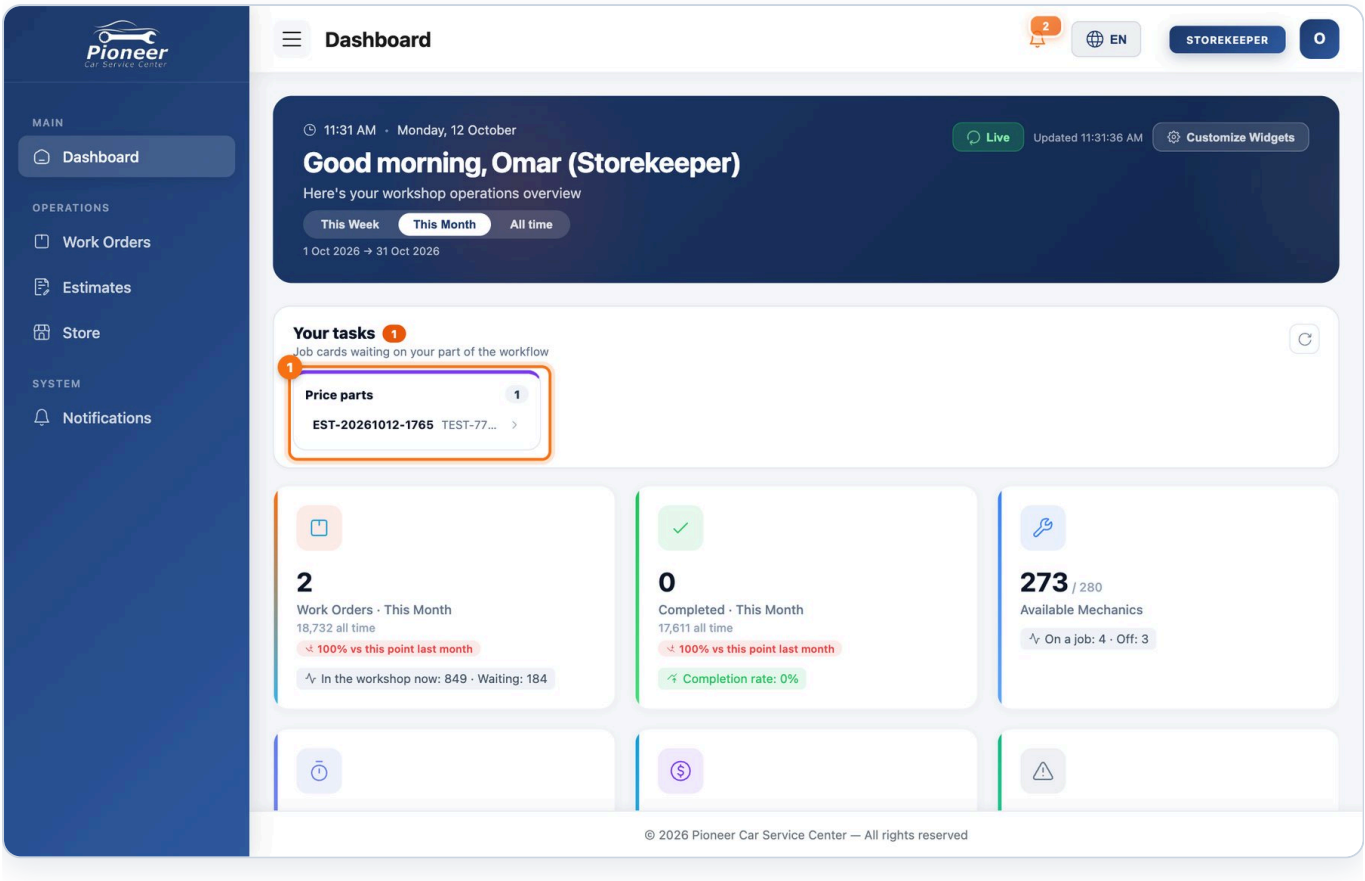

The sign-in page: (1) username or e-mail, (2) password, (3) Sign In.

TIP Use the **EN** button at the top of any page to switch language (Arabic and 10 others). Your choice is remembered on this device.

NOTE Your account is created by the Workshop Manager. Forgot your password? Use **FORGOT PASSWORD?** on the sign-in page or ask the manager to reset it.

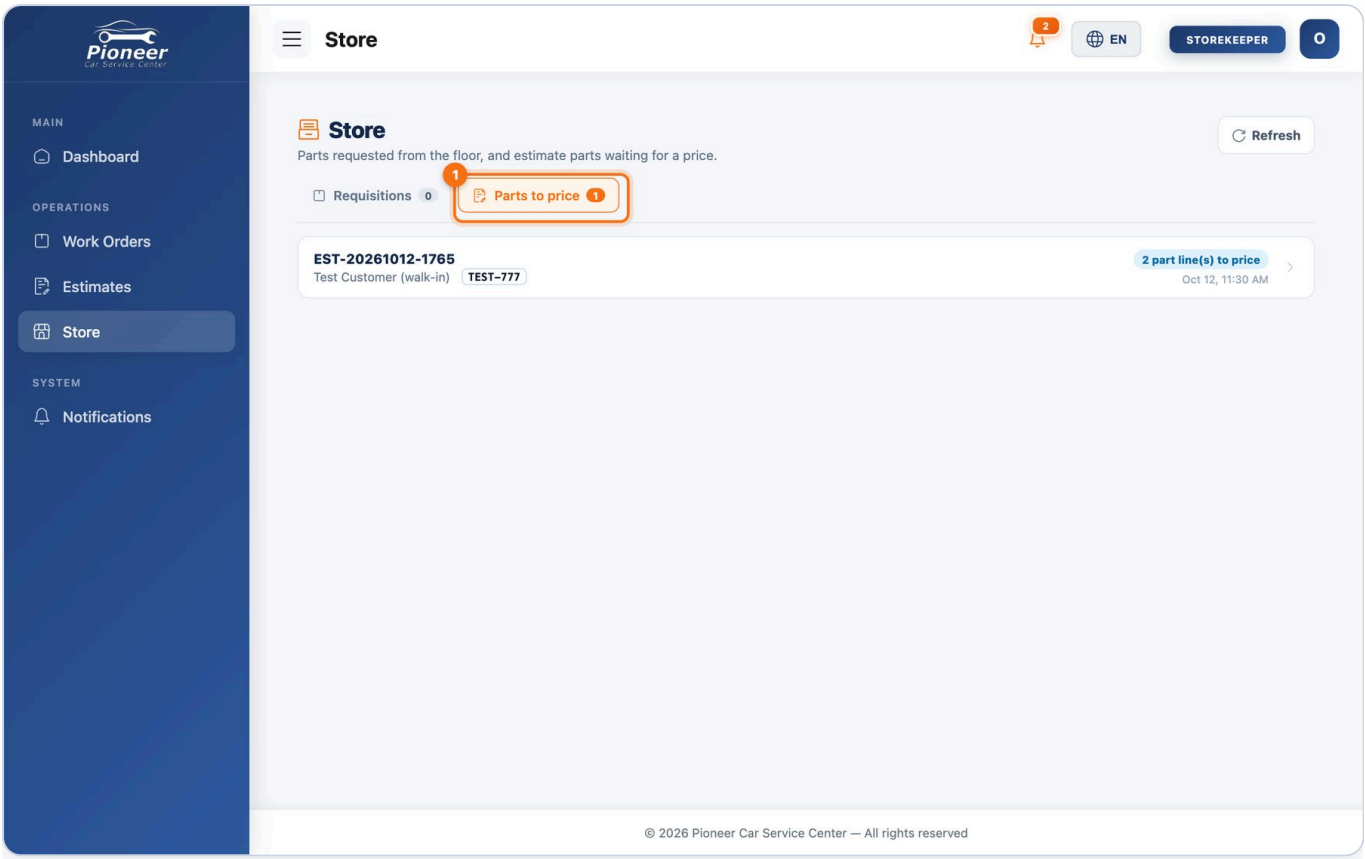

2. Your dashboard and the Store screen

Your tasks — (1) estimates with parts waiting for your price.

The **Your tasks** card on your dashboard lists the job cards waiting on you as Storekeeper: **Price parts** (estimates waiting for part prices) and **Check the shelf / issue parts** (requisitions from the floor). Click any line to open it. The list refreshes every minute; the bell at the top shows new notifications as they arrive.

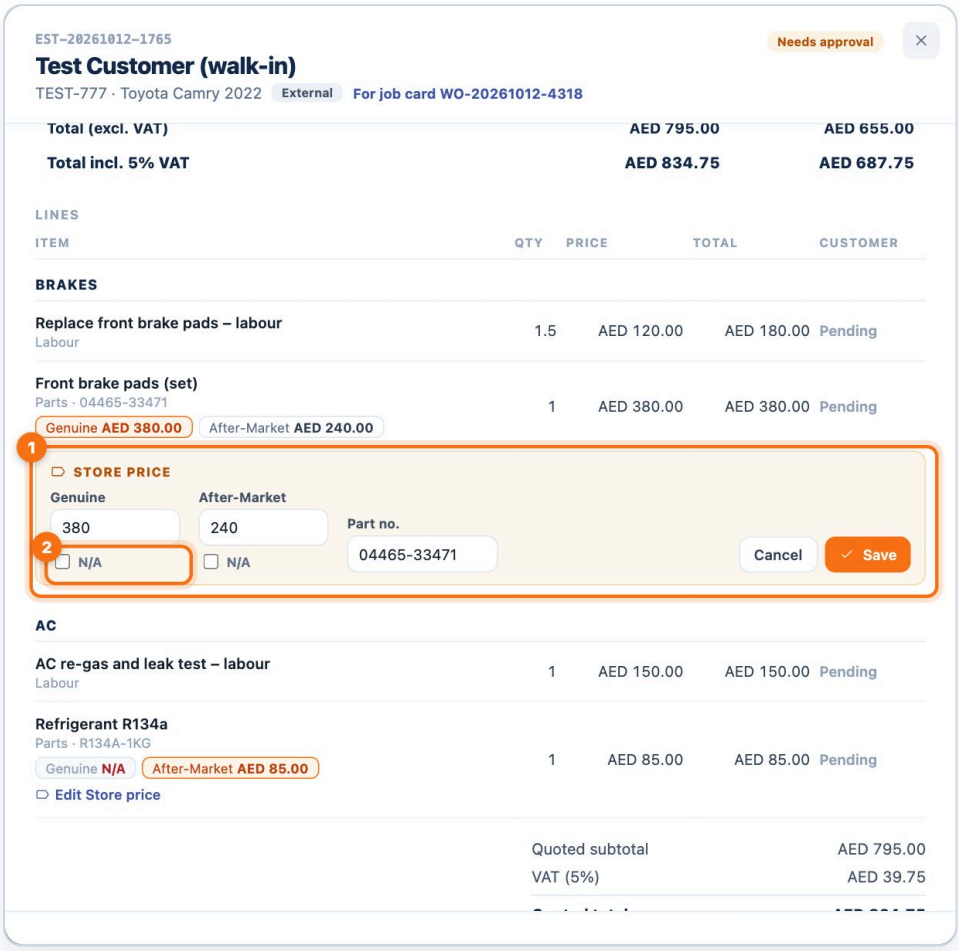

The **Store** screen in the menu has two tabs: **Requisitions** (parts requested from the floor) and **Parts to price** (estimates waiting for prices).

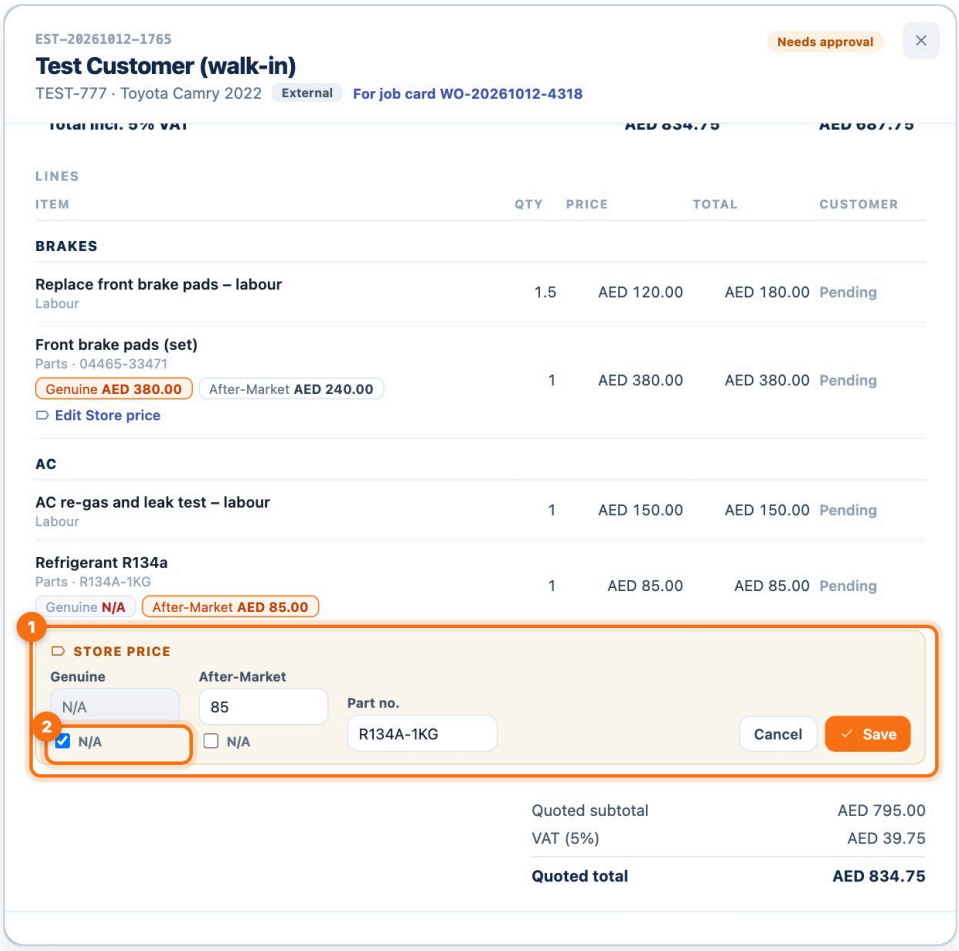

Store → Parts to price.

3. Price the parts on an estimate STEP 5

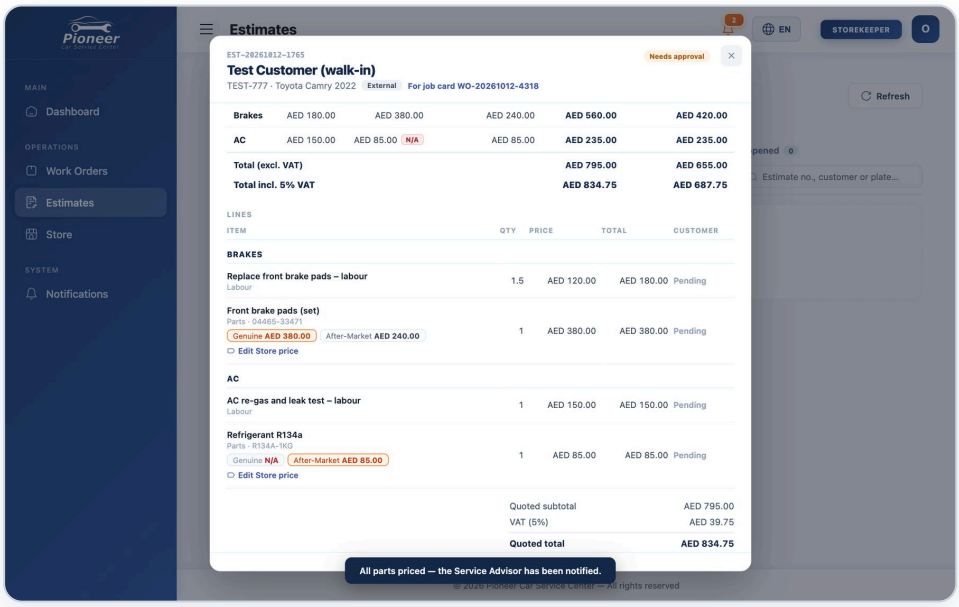

1. Open the estimate from **Your tasks**, the notification, or Store → **Parts to price**.
2. Each part line shows a **Store price** box. Enter the **Genuine** price and the **After-Market** price (per unit).
3. If one type cannot be supplied, tick **N/A** next to it. If neither can, tick both — the part is shown to the customer as not available.
4. Check or correct the **part number**, then press **Save**. Repeat for every part line.

(1) The Store price box for a part line. (2) N/A when a type cannot be supplied.

Genuine not available — N/A ticked, only the After-Market price entered.

All parts priced — the Service Advisor is notified automatically.

THE SYSTEM CHECKS

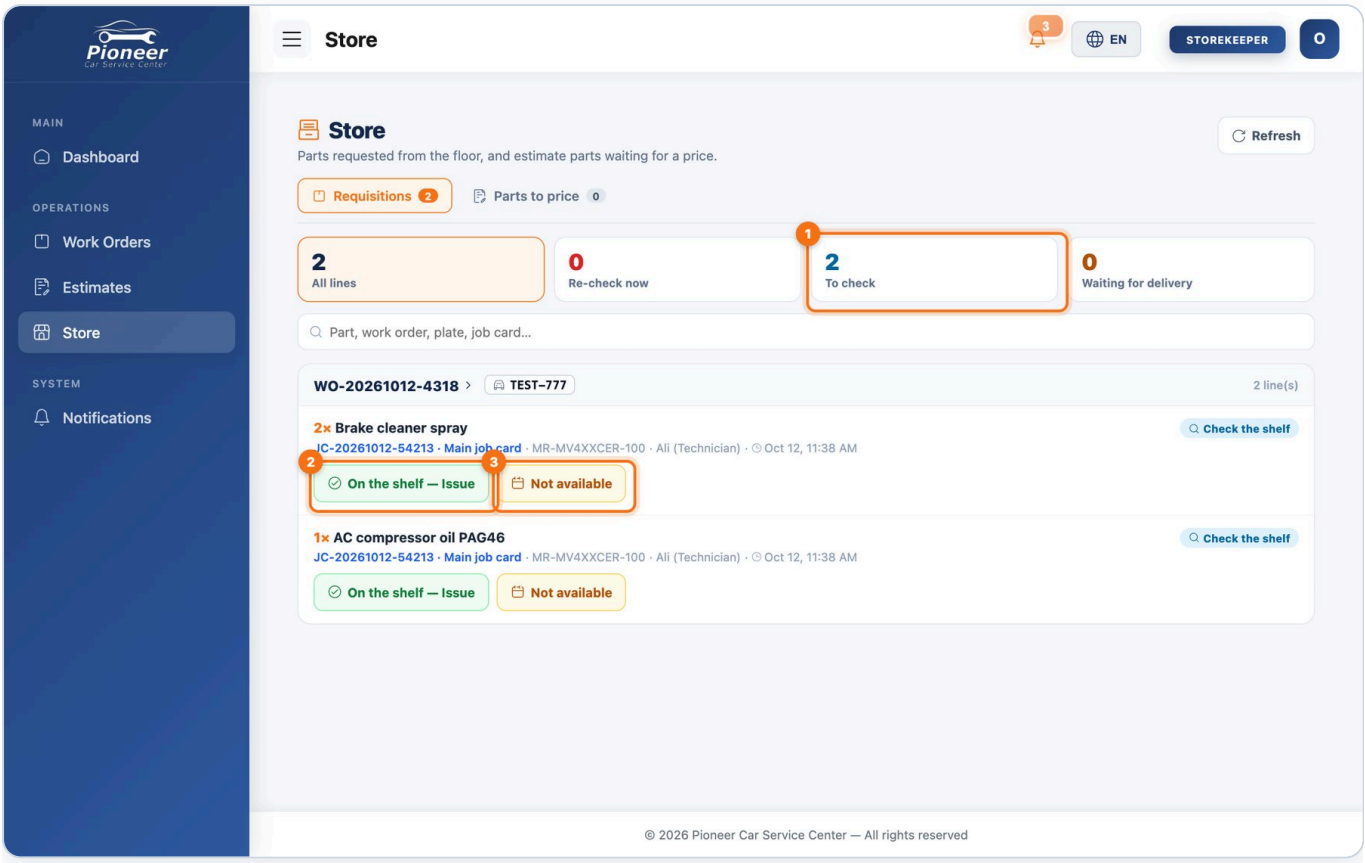

The estimate cannot go to the customer until **EVERY** part line has its prices (or N/A). When you save the last one, the Service Advisor receives **PARTS PRICED**.

TIP

Made a mistake? Use **Edit Store price** on the line while the estimate is still a draft.

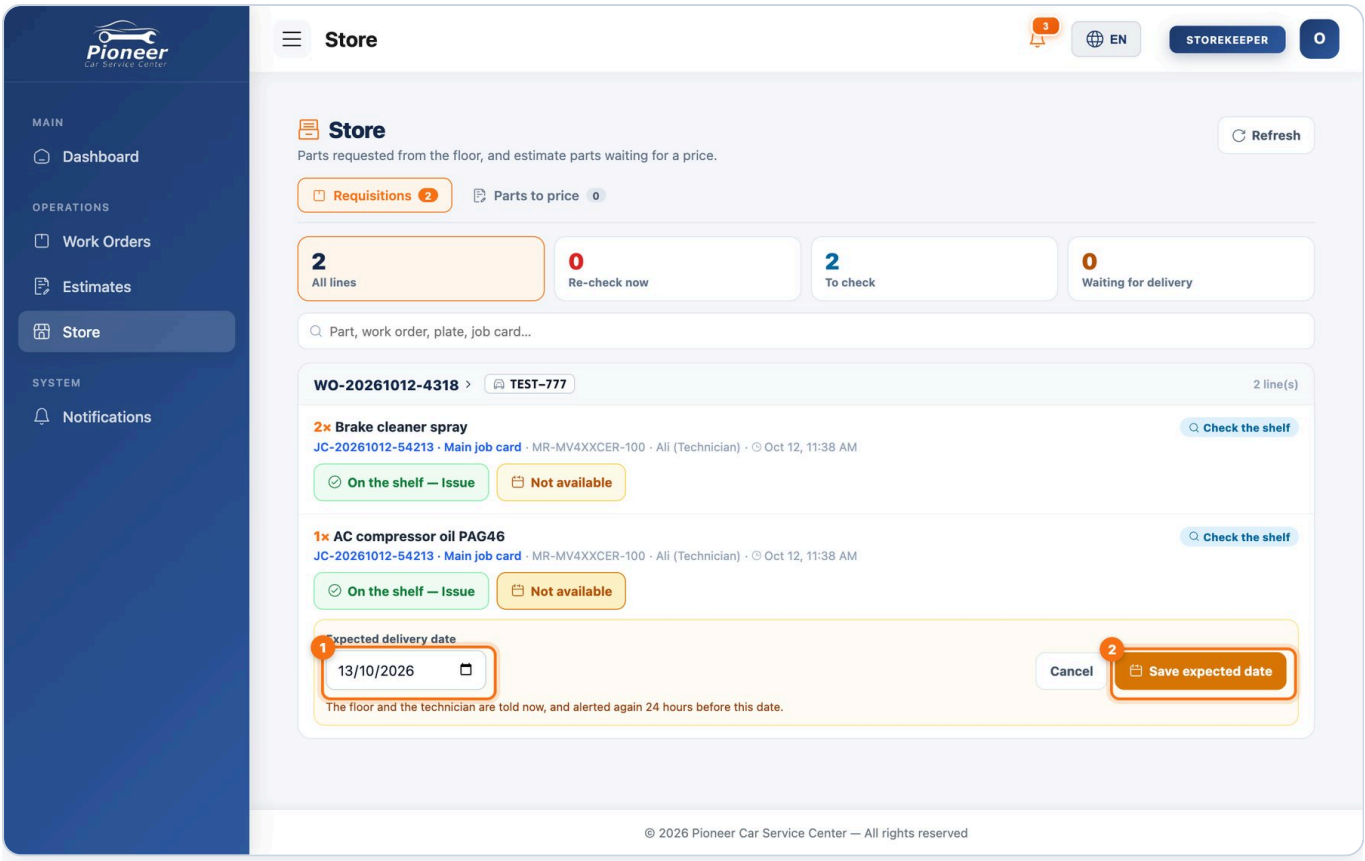

4. Requisitions from the floor STEP 6

When a technician (or Team Leader) presses **Request parts** on a job card, the lines appear under Store → **Requisitions** and in Your tasks. You are notified.

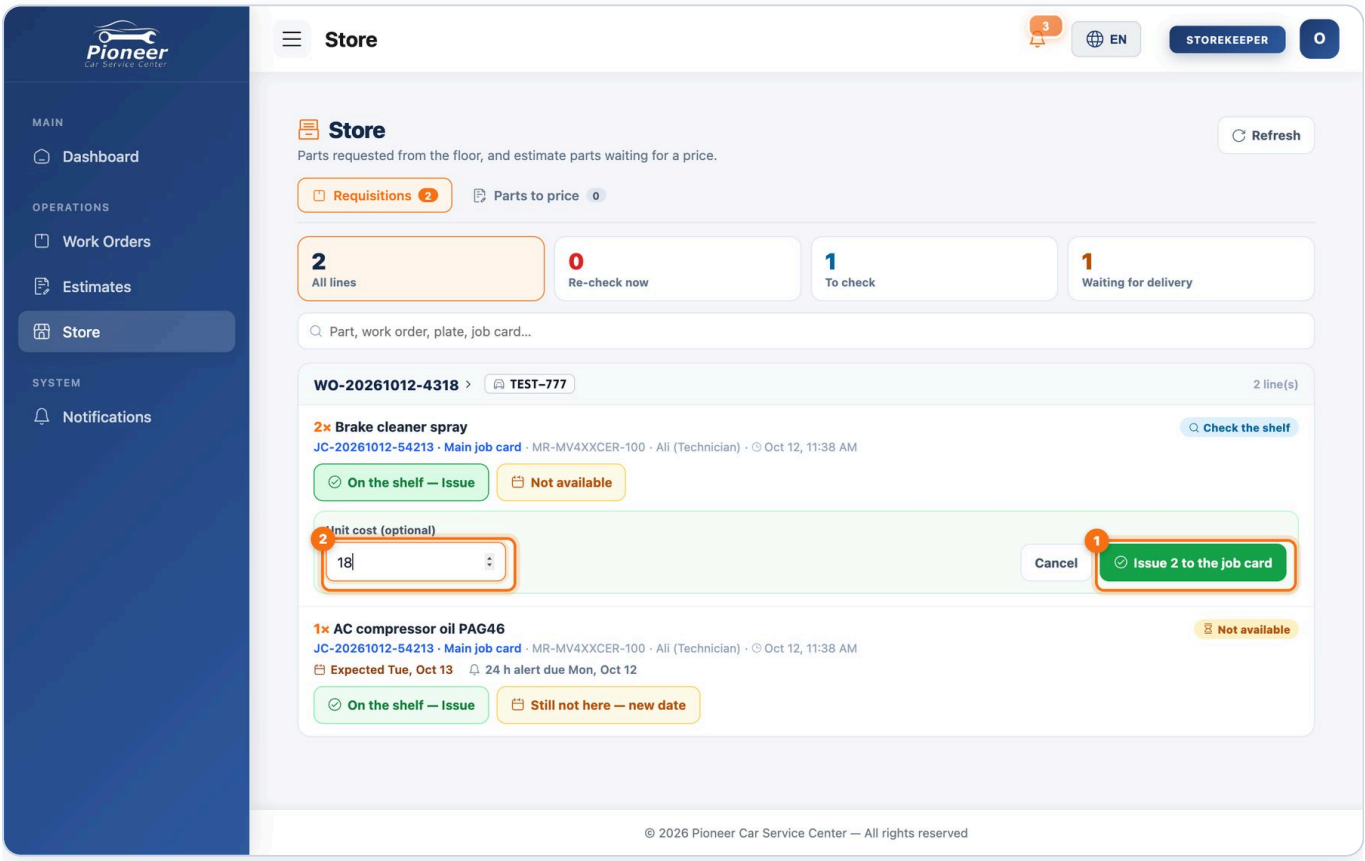

Store → Requisitions — (1) lines to check, (2) issue, (3) not available.

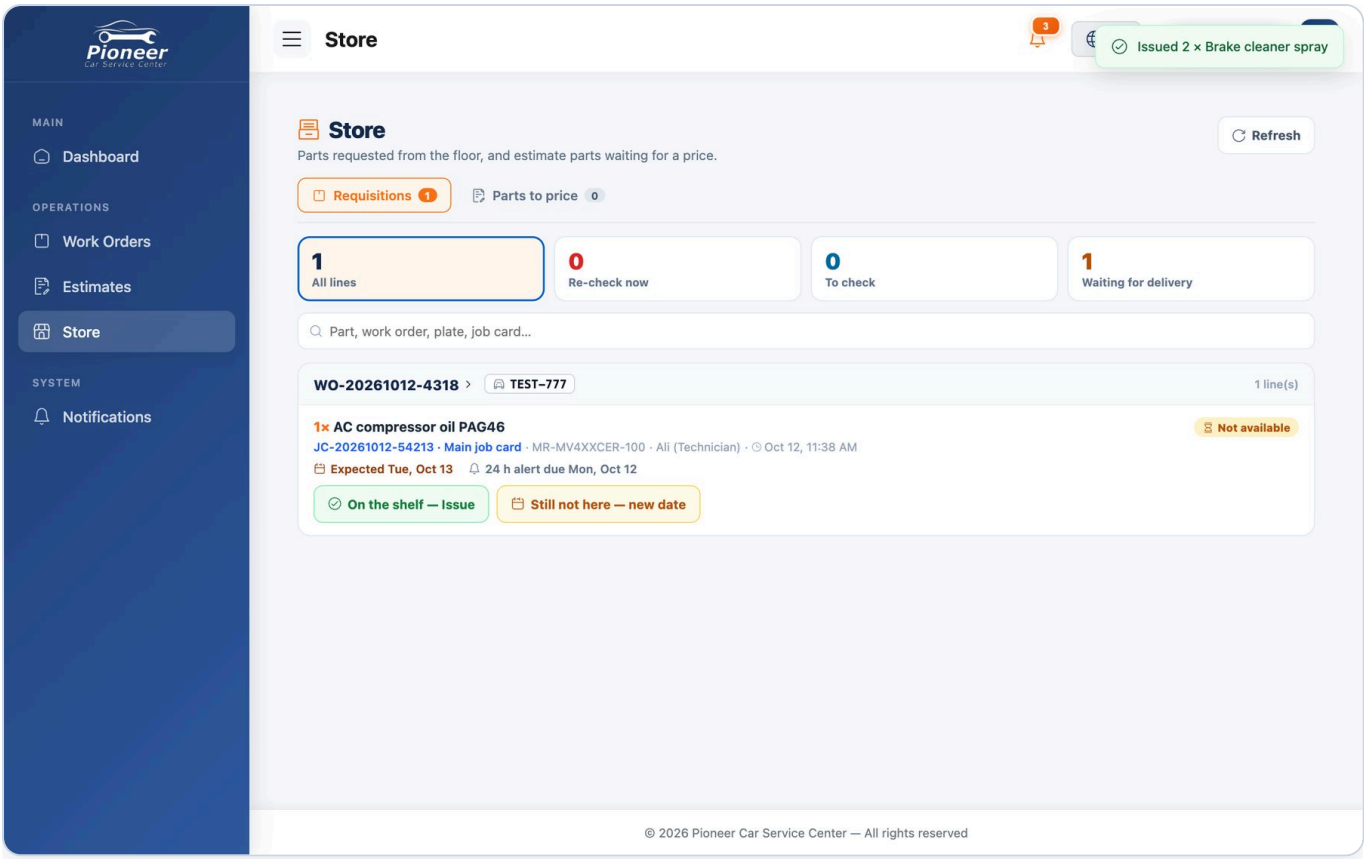

1. Check the shelf for each line.
2. **On the shelf:** press **On the shelf — Issue**, enter the unit cost if you want, and press **Issue … to the job card**. The technician sees **Issued**.
3. **Not on the shelf:** press **Not available**, choose the **expected delivery date** and save. The Team Leader and technician are told now and alerted again 24 hours before that date.
4. When the part arrives (or the expected date is reached — the line returns under **Re-check now**), issue it.

Not available — (1) the expected delivery date, (2) save it.

On the shelf — (1) issue to the job card, (2) optional unit cost.

Issued. The late part stays under Waiting for delivery until it arrives.

NOTE

Filters at the top: **To check**, **Waiting for delivery**, **Re-check now** and **All lines**. Search finds a part, work order, plate or job card.

5. Quick reference

You want to…	Where	Button
Price an estimate's parts	Estimates → the estimate (or Store → Parts to price)	Store price → **Save**
Mark a type unavailable	Store price box	Tick **N/A**
Issue a requested part	Store → Requisitions	**On the shelf — Issue**
Part not in stock	Store → Requisitions	**Not available** + expected date
Part still late	Store → Re-check now	**Still not here — new date**

USER MANUAL

Supervisor & Workshop Foreman

Approve estimates for external customers, keep the floor moving, and carry out the 3-point quality check and test drive.

Step 5 · Estimate to customer

Step 6 · Customer decision & work

Step 7 · Quality check, pickup & closure

Your role at a glance

The **Supervisor** approves estimates for external customers before they are sent (Step 5), can assign technicians and open sub-job cards like the Team Leader (Step 6), and performs the **quality check and test drive** when a job card is done (Step 7). The **Workshop Foreman** has the same floor and quality-check duties but does not approve estimates or open job cards.

Where you fit in the job card workflow

1	2	3	4	5	6	7
Customer classification	**Vehicle information & issue**	**Job card opened**	**Inspection & pricing**	**Estimate to customer**	**Customer decision & work**	**Quality check, pickup & closure**

3 Approve an estimate
4 Assigning and sub-job cards
5 Quality check & test drive
6 Quick reference

1. Signing in

1. Open the workshop system in your browser (Chrome, Edge or Safari).
2. Type your **username or e-mail** and your **password**, then press **Sign In**.
3. The system opens your dashboard. Your role — **Supervisor** — is shown at the top right.

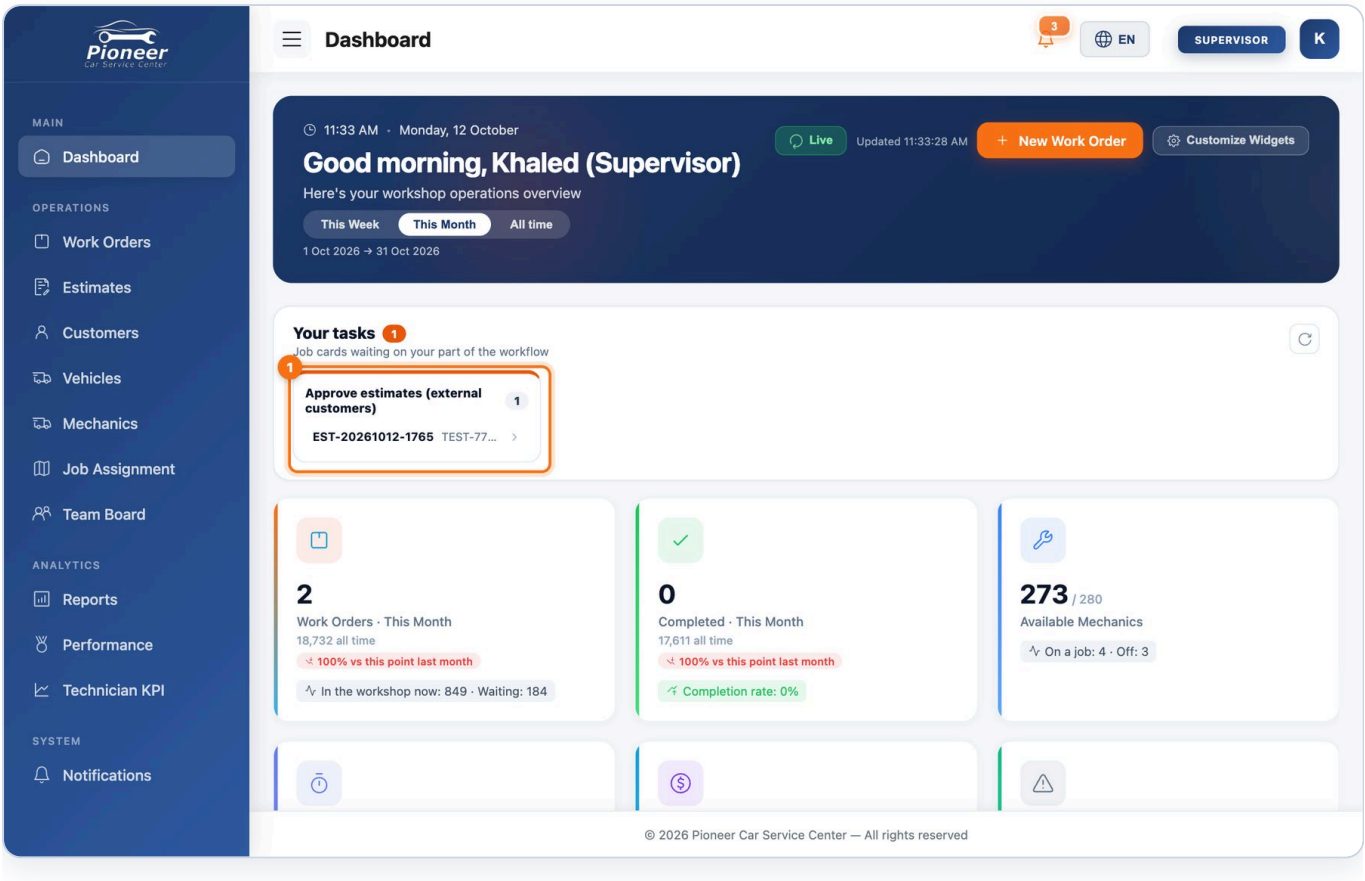

The sign-in page: (1) username or e-mail, (2) password, (3) Sign In.

TIP Use the **EN** button at the top of any page to switch language (Arabic and 10 others). Your choice is remembered on this device.

NOTE Your account is created by the Workshop Manager. Forgot your password? Use **FORGOT PASSWORD?** on the sign-in page or ask the manager to reset it.

2. Your dashboard

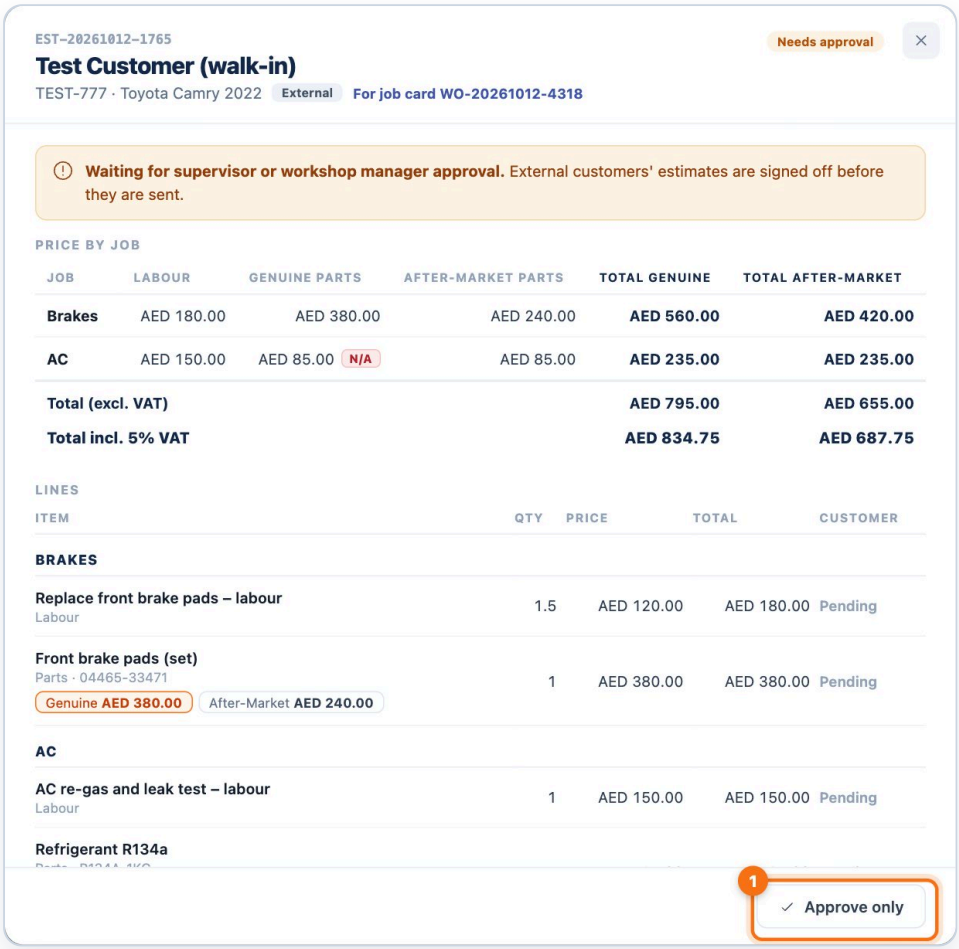

Your tasks — (1) an estimate waiting for your approval.

The **Your tasks** card on your dashboard lists the job cards waiting on you as Supervisor: **Approve estimate**, **Assign technician**, **Quality check** and **Rework**. Click any line to open it. The list refreshes every minute; the bell at the top shows new notifications as they arrive.

3. Approve an estimate STEP 5

Estimates for **external** customers (walk-in, outside fleets, insurers) need your approval before the Service Advisor can send them. Internal customers do not.

1. Open the estimate from **Your tasks** or the notification **Estimate needs approval**.
2. Check the jobs, labour and the Store's Genuine / After-Market prices and totals.
3. Press **Approve only**. The Service Advisor is notified that it can be sent.

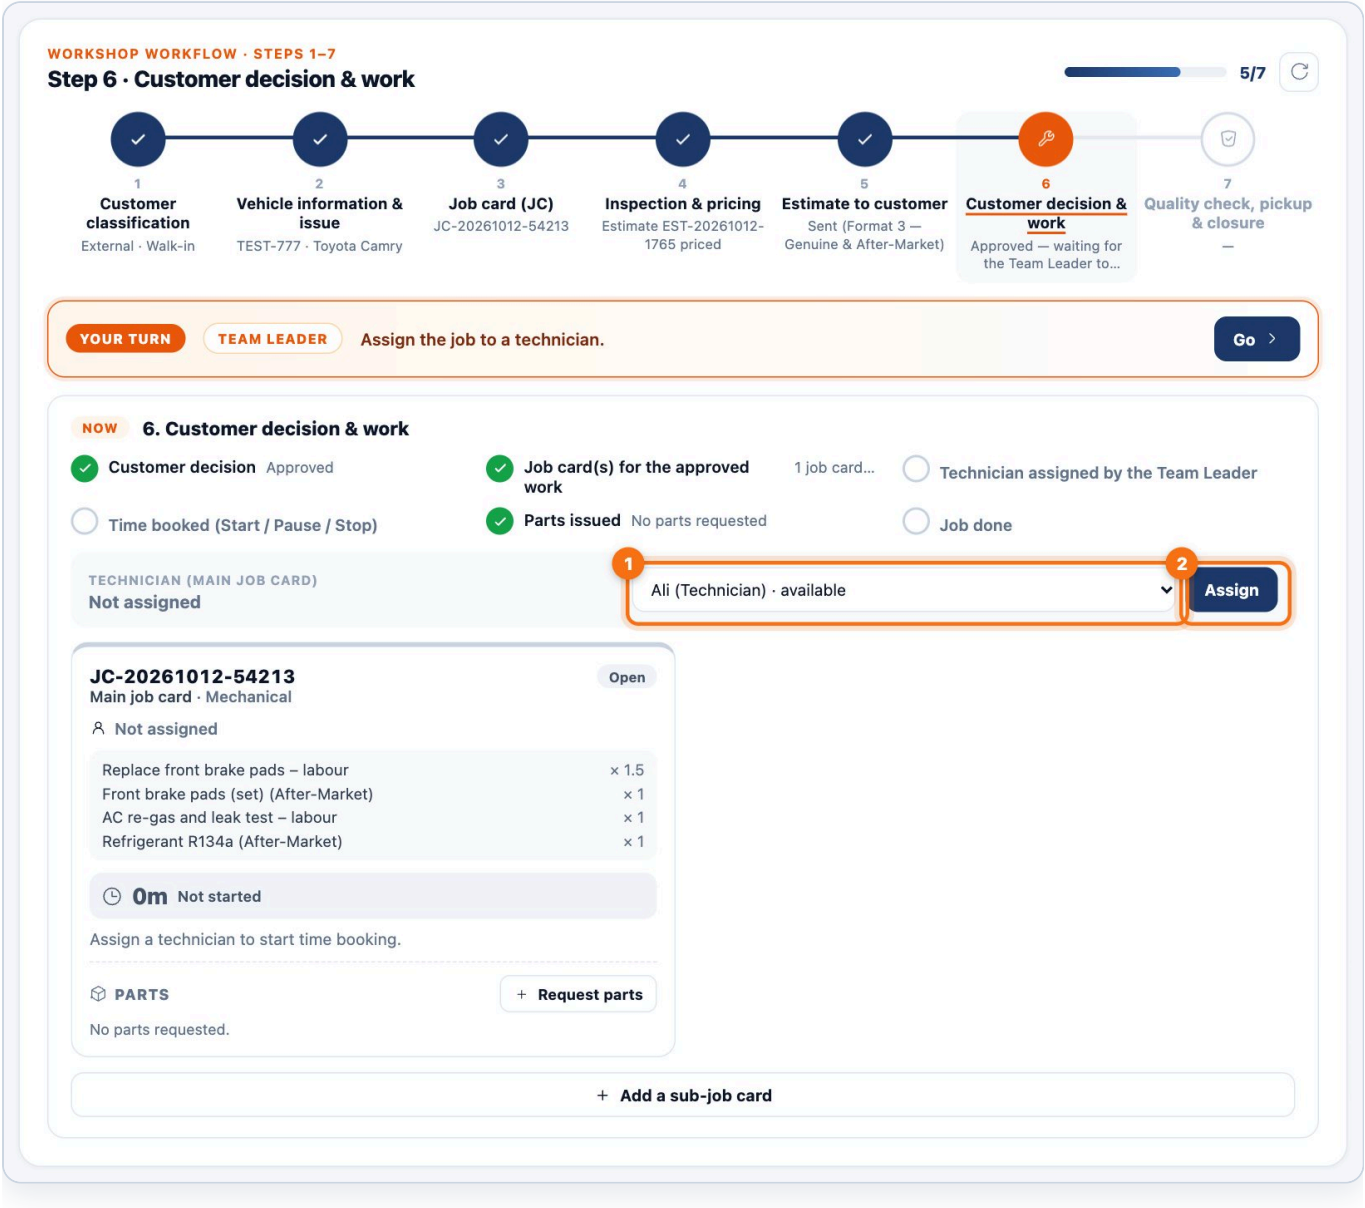

The estimate waiting for sign-off — Approve only.

NOTE

Sending to the customer stays with the Service Advisor. If something is wrong, tell the Service Advisor to correct it with Edit — editing clears any approval.

4. Assigning and sub-job cards STEP 6

You can do everything the Team Leader does on the floor: assign the technician to the main job card, open **sub-job cards** for other departments, book time for a technician and request parts. See the Team Leader manual for the details; the screens are the same.

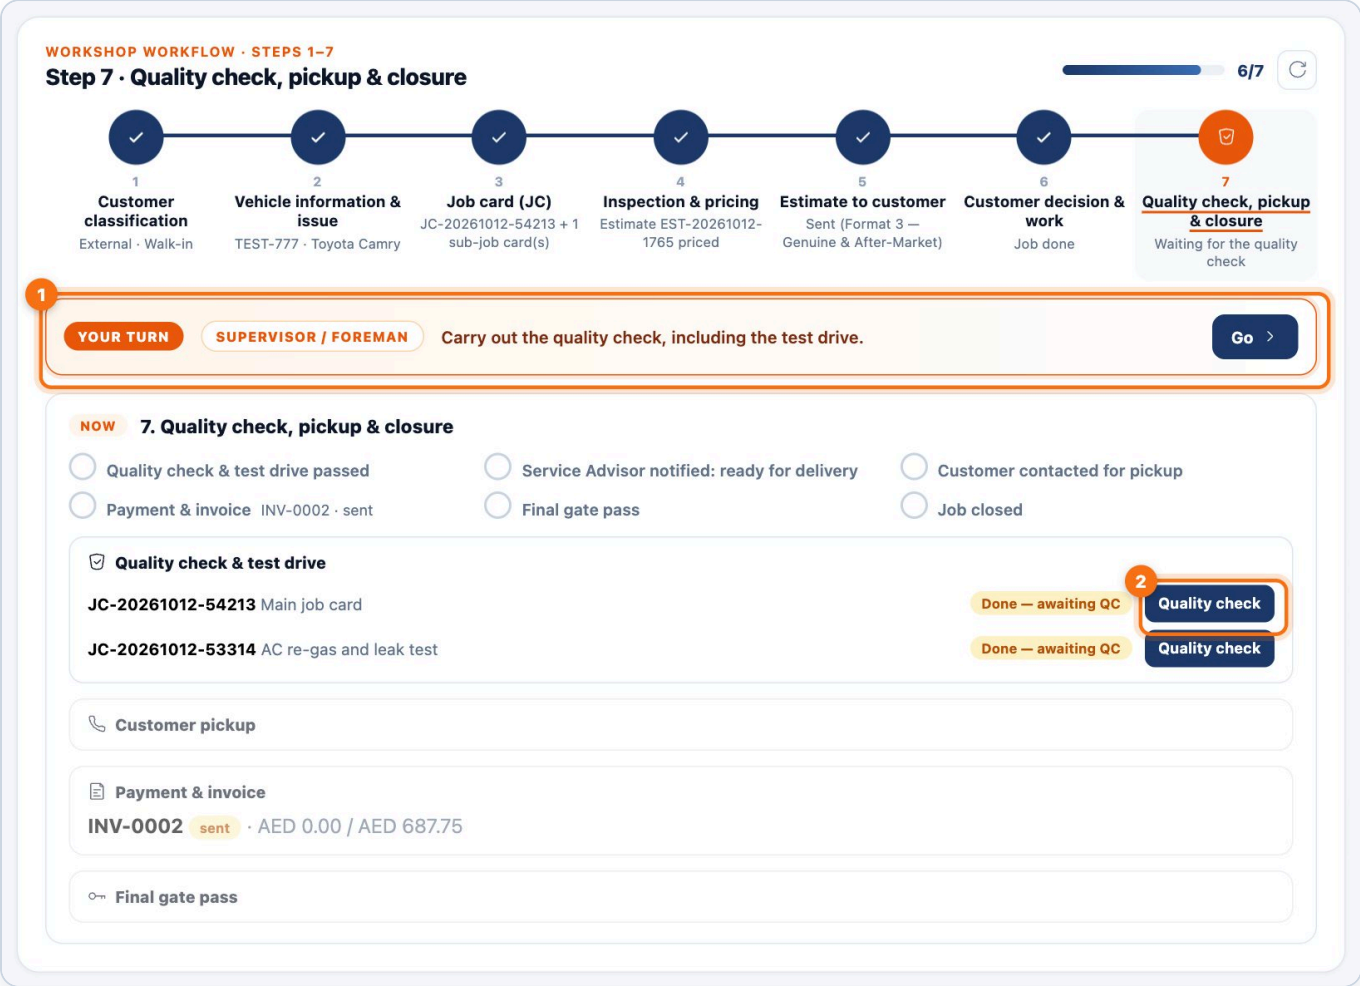

Step 6 on the job card — assign the technician.

5. Quality check & test drive STEP 7

When a technician presses **Job done**, the job card waits for the quality check and you are notified (**Ready for quality check**). Each job card — main and sub — is checked on its own.

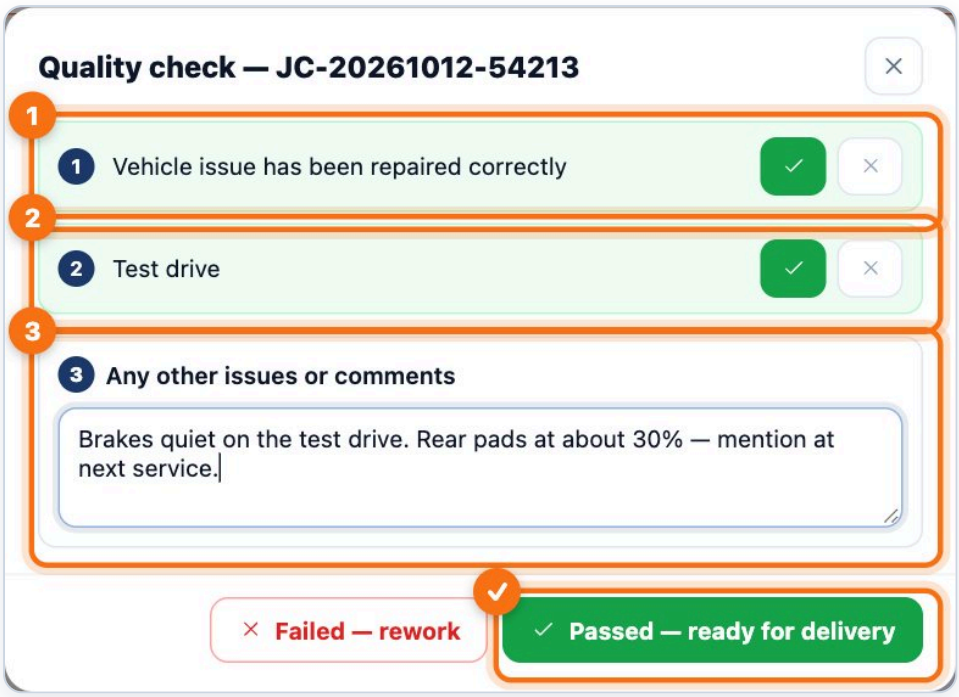

Your tasks — job cards waiting for the quality check.

Step 7 on the job card: each job card (main and sub) has its own Quality check button.

1. Open the job card from **Your tasks** (or the notification). Step 7 lists every job card that is **Done — awaiting QC**.
2. Press **Quality check** next to a job card.
3. Answer the **three points**: (1) **Vehicle issue has been repaired correctly** — OK / Not OK; (2) **Test drive** — OK / Not OK; (3) **Any other issues or comments** — free text.

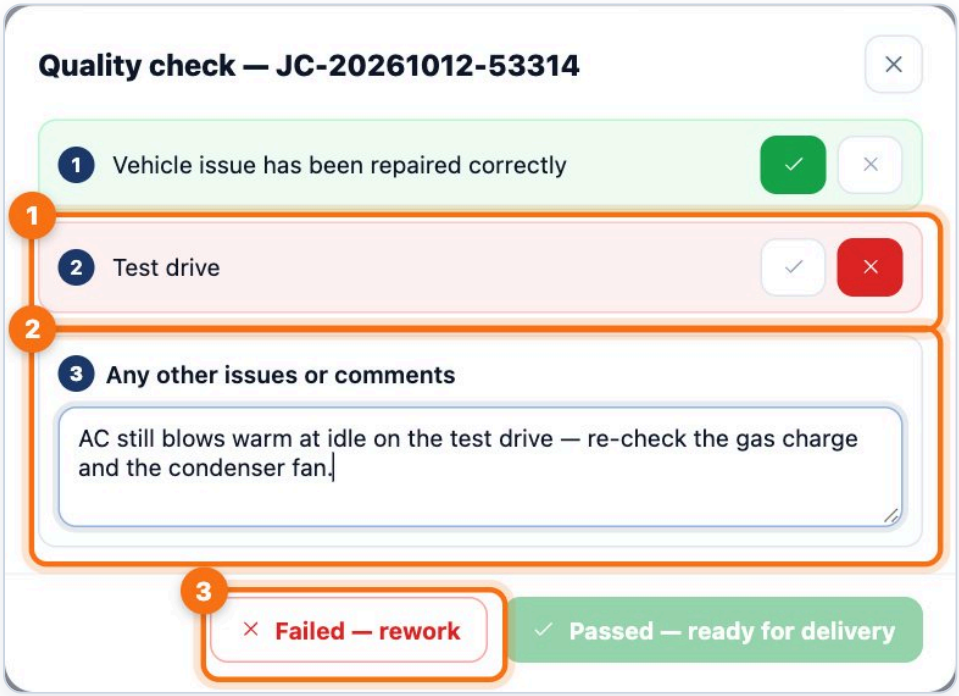

4 Choose **Passed — ready for delivery** or **Failed — rework** and save.

The 3-point quality check — both checks OK, a comment, Passed.

THE SYSTEM CHECKS A job card can pass only when points 1 and 2 are both OK. A failed check needs a comment saying what is wrong — the Team Leader and technician see it.

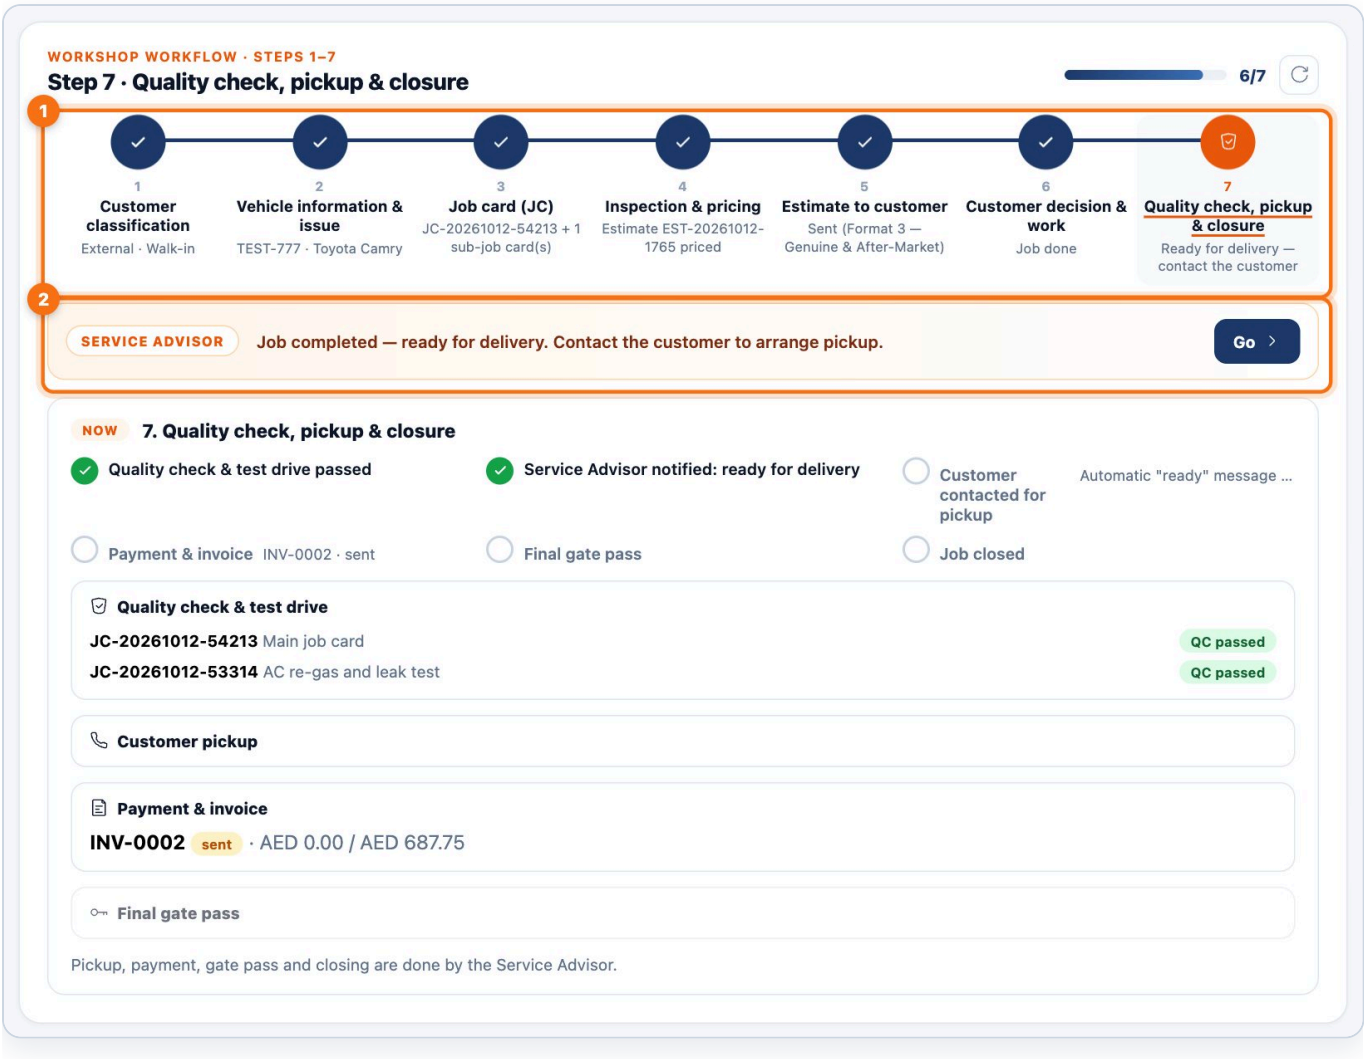

When the check fails

Test drive Not OK (1), what is wrong (2), Failed — rework (3).

The job card goes back to the floor as **Rework**. The technician books more time, fixes it and presses Job done again; you check it again.

When every job card has passed

All job cards passed — the job moves to the Service Advisor for pickup.

The work order moves to **Ready for pickup** and the Service Advisor is notified **Job completed — ready for delivery**.

6. Quick reference

Team Board.

3. Assign the technician STEP 6

1. Open the job card from **Your tasks** (or the notification **Approved: WO-…**).
2. In Step 6, find the **main job card** and choose a technician in **Assign to…**, then press **Assign**.
3. The technician is notified and the job card appears on their phone.

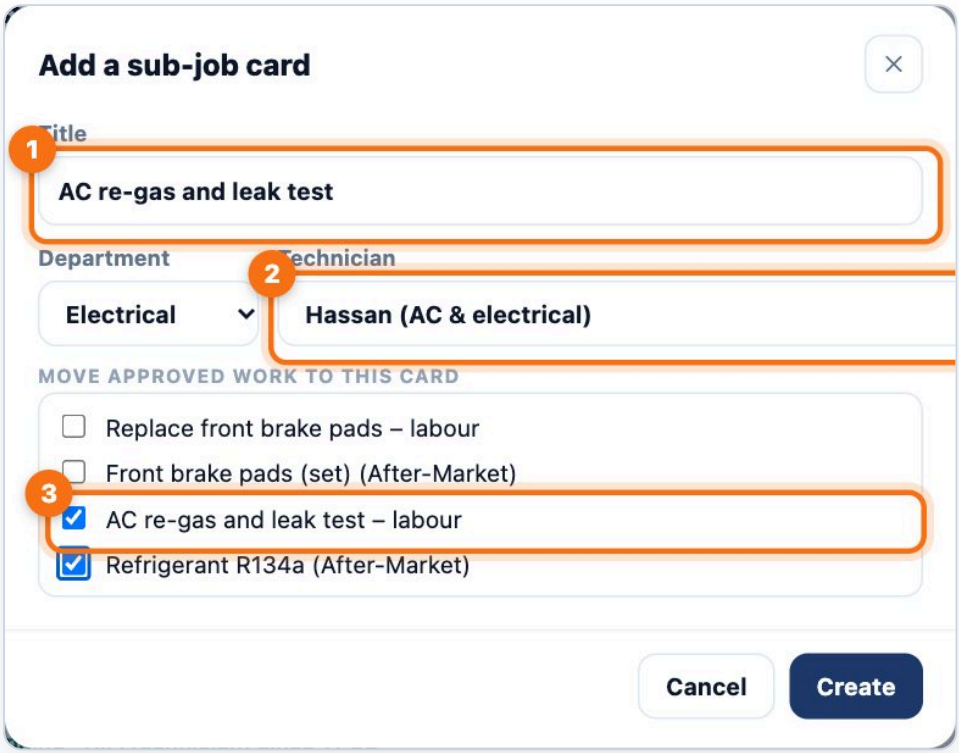

Assigning the main job card: (1) choose the technician, (2) Assign.

4. Sub-job cards for other departments STEP 6

When part of the work belongs to another department or technician (e.g. body & paint), open a **sub-job card** under the main one. Each sub-job card has its own technician, time and quality check.

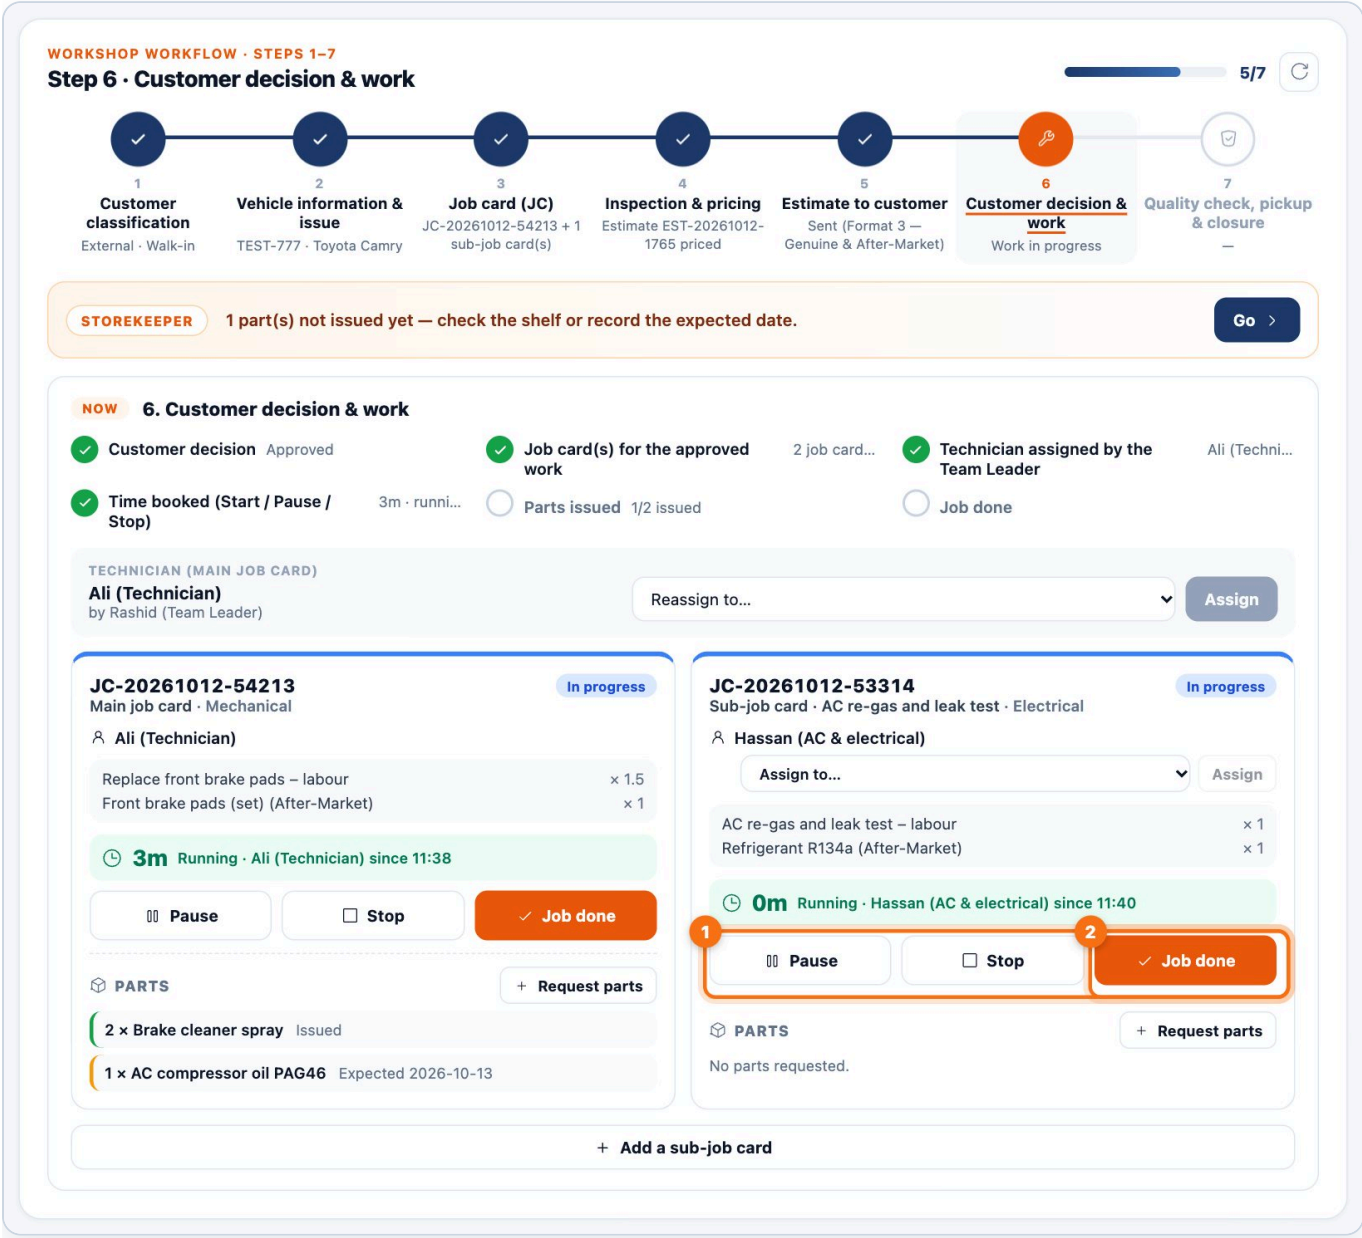

1. In Step 6 press **Add a sub-job card**.
2. Enter a title, choose the department and the technician; optionally move approved work lines onto it.
3. Press **Create**.

New sub-job card — (1) title, (2) technician, (3) approved work moved onto it.

5. Booking time and requesting parts STEP 6

Technicians book their own time on their phone. When needed you can do it for them on the job card: **Start**, **Pause** (with a reason), **Resume**, **Stop**, and **Job done** when the work is finished. **Request parts** sends a requisition to the Store.

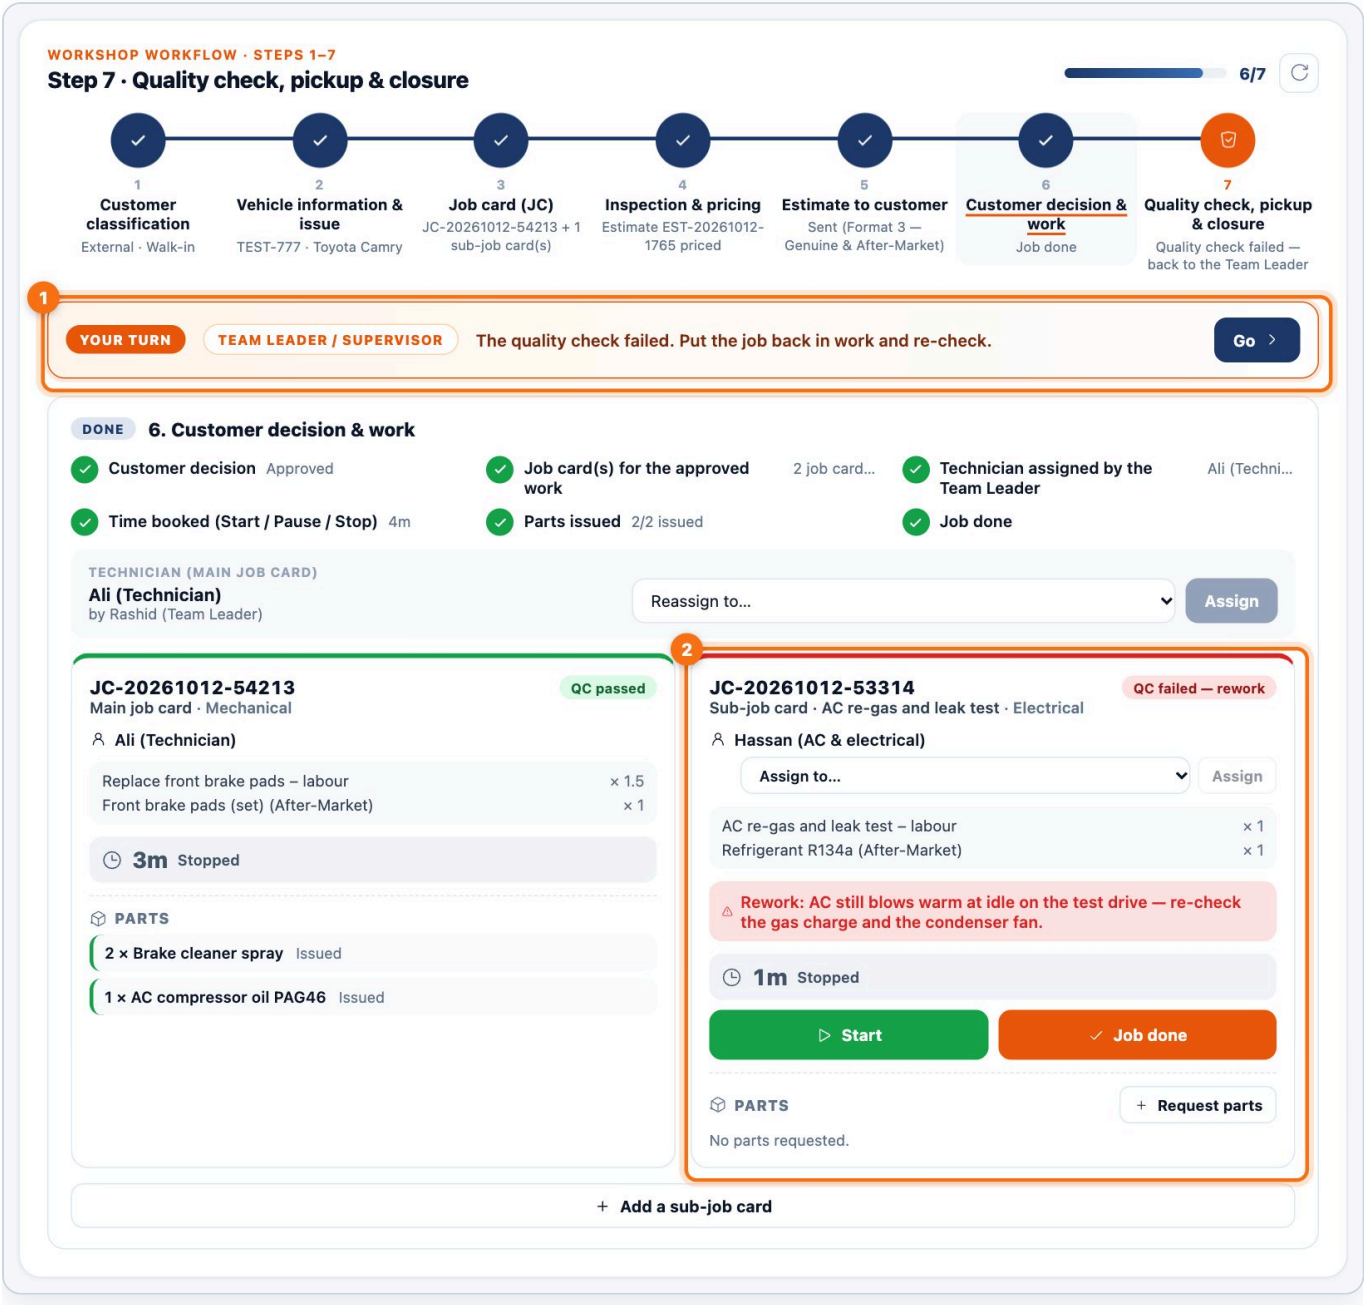

Main and sub-job card side by side — (1) time for the sub-job card's technician, (2) Job done.

THE SYSTEM CHECKS

A job card cannot be marked done before time has been booked on it. Parts not on the shelf show their expected date; you are alerted 24 hours before it.

6. Rework after a failed quality check STEP 7

If the quality check fails, the job card returns as **Rework** with the inspector's comment, and appears under **Rework** in Your tasks. Make sure the technician restarts the time, fixes the issue and presses Job done again.

(1) Your turn — the check failed. (2) The job card back in Rework with the inspector's reason; Start the time again, then Job done.

You can also perform the quality check yourself — see the Supervisor manual for the 3-point check.

What the system lets you do

Step 6 Book time (Start / Pause / Stop) and mark jobs done

Step 6 Raise material requisitions (request parts)

In this manual

1 Signing in

2 Your job cards

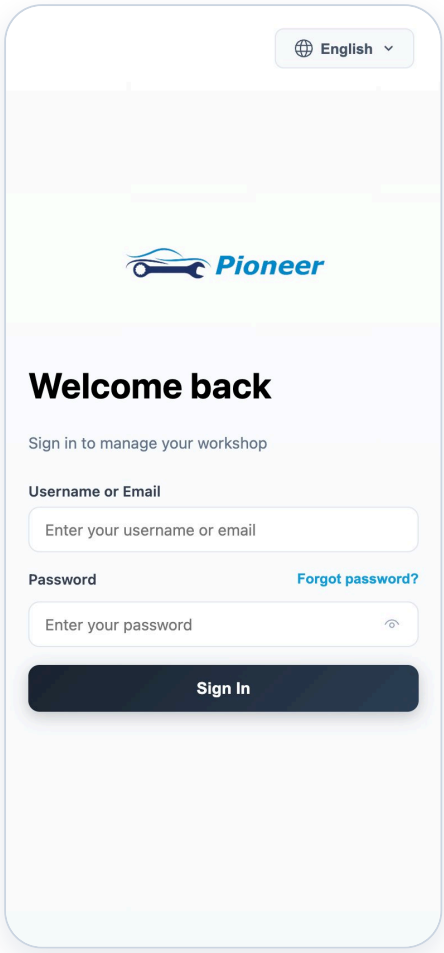

3 Book your time

4 Request parts

5 Job done

1. Signing in

1. Open the workshop system in your browser (Chrome, Edge or Safari).
2. Type your **username or e-mail** and your **password**, then press **Sign In**.
3. The system opens your dashboard. Your role — **Technician** — is shown at the top right.

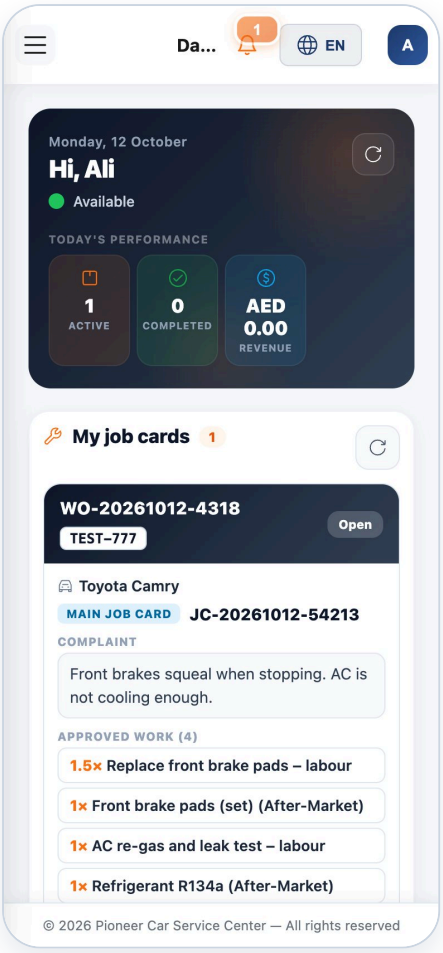

The sign-in page on a phone.

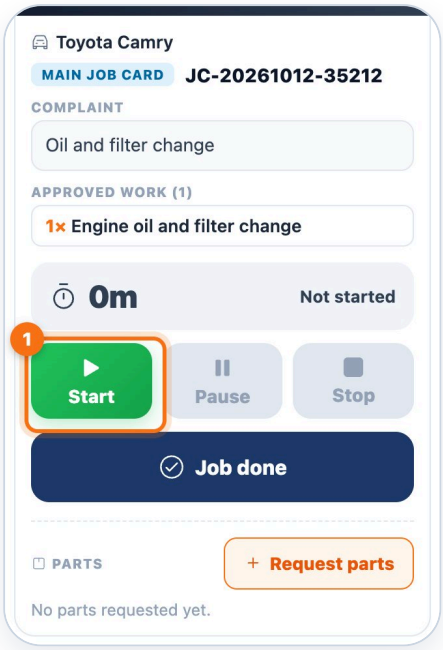

TIP Use the **EN** button at the top of any page to switch language (Arabic and 10 others). Your choice is remembered on this device.

NOTE Your account is created by the Workshop Manager. Forgot your password? Use **FORGOT PASSWORD?** on the sign-in page or ask the manager to reset it.

2. Your job cards

Your job cards on the home screen.

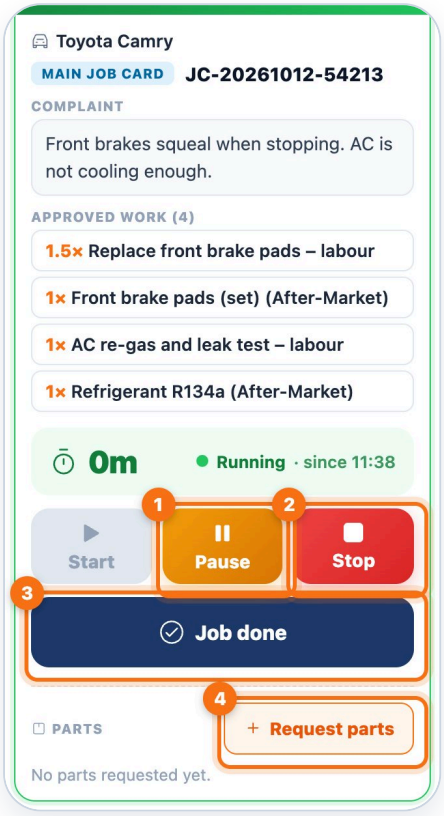

A job card: the complaint, the approved work and (1) Start.

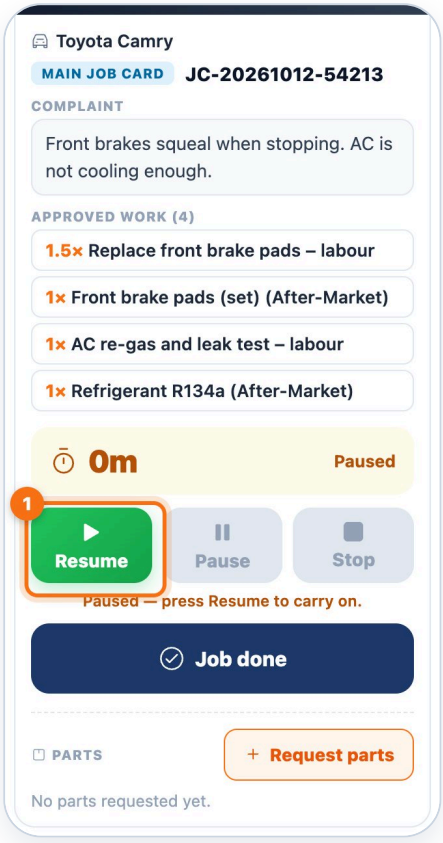

Each card shows the vehicle, the customer's complaint and the **approved work**. Only job cards assigned to you are shown.

3. Book your time STEP 6

1. Press **Start** when you begin working on the job card. The clock runs.
2. Press **Pause** for a break or while you wait for parts; press **Resume** to carry on.
3. Press **Stop** when you leave the job for now (end of shift, moved to another car).

Time running — (1) Pause, (2) Stop, (3) Job done, (4) Request parts.

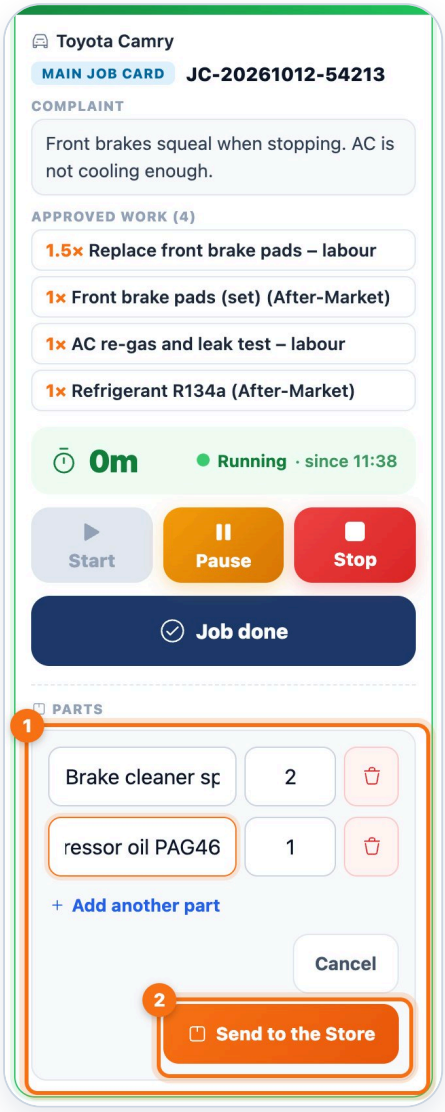

Paused — Resume to carry on.

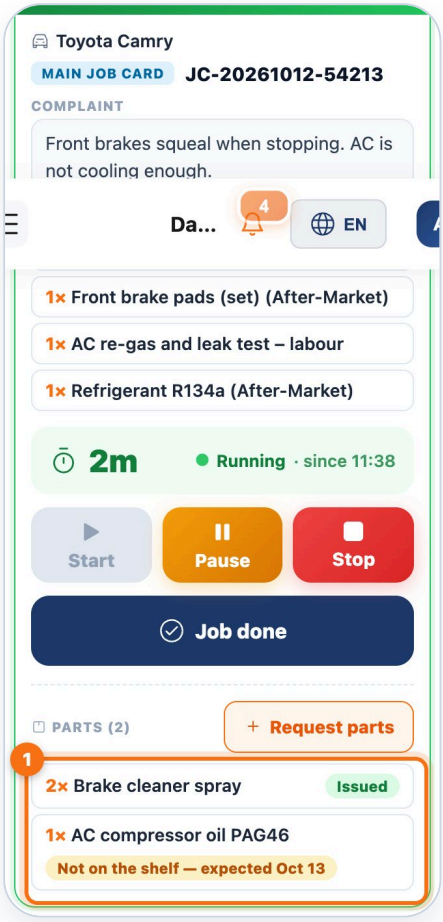

NOTE The time on each job card is what the workshop uses for your hours and for the job's labour, so start and stop it as you actually work.

4. Request parts STEP 6

1. Press **Request parts** on the job card.
2. Describe each part and the quantity (**Add another part** for more).
3. Press **Send to the Store**. The Store is notified.

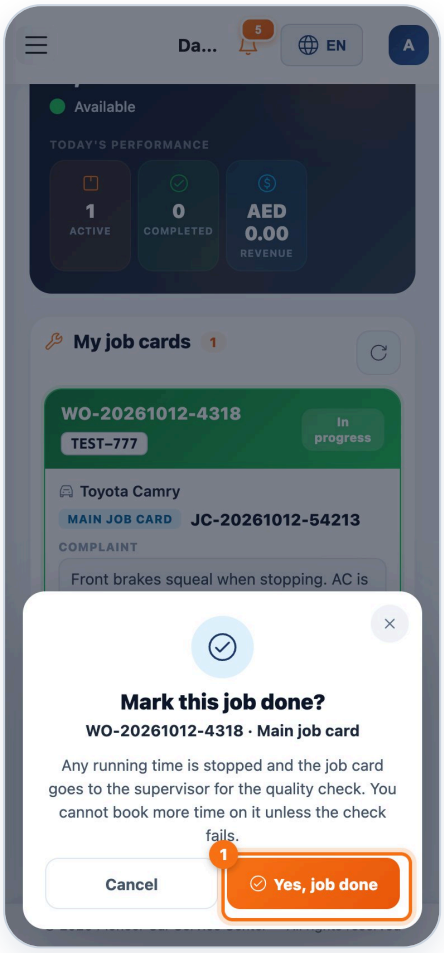

Requesting parts.

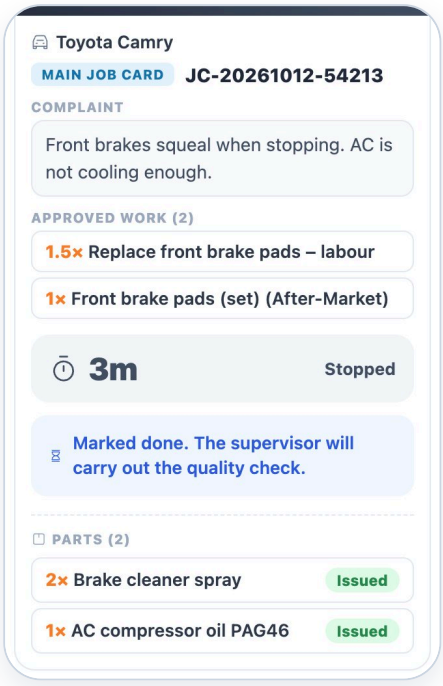

Parts status: issued, waiting, or not on the shelf with the expected date.

5. Job done STEP 6

1. When the work is finished press **Job done** and confirm.
2. Any running time stops and the job card goes to the Supervisor for the **quality check**.

Confirm Job done.

Waiting for the quality check.

THE SYSTEM CHECKS Job done is refused if no time was booked. After Job done you cannot book more time unless the quality check fails.

Rework: if the quality check fails, the job card comes back marked **Rework needed** with the inspector's comment. Start the time again, fix it, and press Job done.

USER MANUAL

Workshop Manager

Oversee every job card, step in at any step, approve estimates and decide who does what in Settings → Roles.

- Step 1 · Customer classification
- Step 2 · Vehicle information & issue
- Step 3 · Job card opened
- Step 4 · Inspection & pricing
- Step 5 · Estimate to customer
- Step 6 · Customer decision & work
- Step 7 · Quality check, pickup & closure

Your role at a glance

As Workshop Manager (or General Manager / owner) you hold **every** workflow responsibility: you can act at any step when someone is away, you approve external estimates like the Supervisor, and you control **who does what** — each role's workflow responsibilities and menu — in **Settings → Roles**.

Where you fit in the job card workflow

1	2	3	4	5	6	7
Customer classification	**Vehicle information & issue**	**Job card opened**	**Inspection & pricing**	**Estimate to customer**	**Customer decision & work**	**Quality check, pickup & closure**
Service Advisor	Service Advisor	System · Service Advisor	Service Advisor · Technician	Store · Supervisor · Service Advisor	Customer · Team Leader · Technician · Store	Supervisor · Service Advisor

What the system lets you do

- **Step 2** Open job cards and record the vehicle and issue
- **Step 4** Raise and send estimates; price labour
- **Step 5** Price parts — Genuine / After-Market / N/A
- **Step 5** Approve estimates for external customers
- **Step 6** Record the customer's decision
- **Step 6** Assign technicians; open sub-job cards
- **Step 6** Book time (Start / Pause / Stop) and mark jobs done
- **Step 6** Raise material requisitions (request parts)
- **Step 6** Check the shelf, issue parts, record expected dates
- **Step 7** Quality check and test drive
- **Step 7** Pickup call, payment, gate pass, close the job

In this manual

1 **Signing in**

2 **Your dashboard**

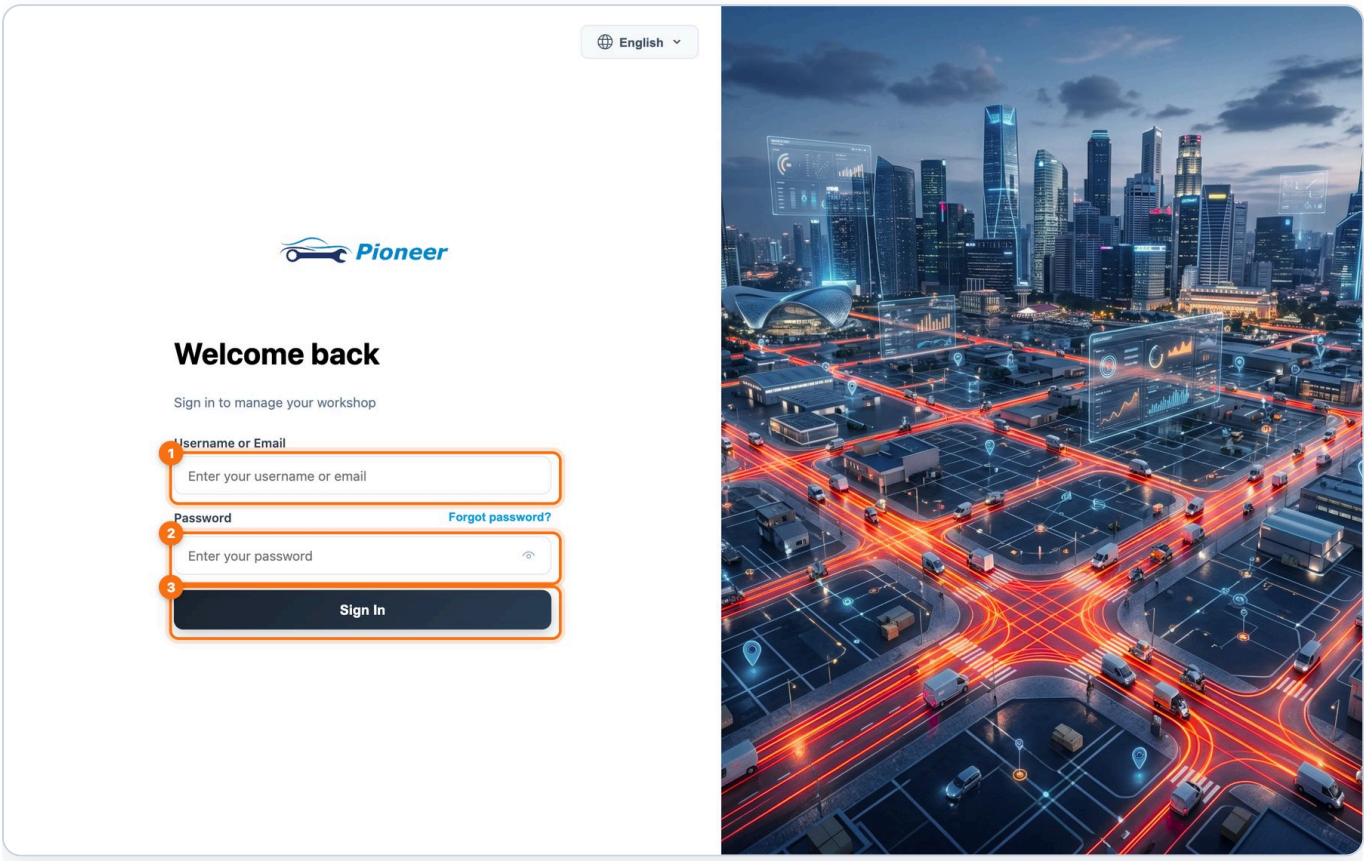

3 **Following a job through Steps 1–7**

4 **Roles and responsibilities (Settings → Roles)**

5 **Default responsibilities**

1. Signing in

1. Open the workshop system in your browser (Chrome, Edge or Safari).
2. Type your **username or e-mail** and your **password**, then press **Sign In**.
3. The system opens your dashboard. Your role — **Workshop Manager** — is shown at the top right.

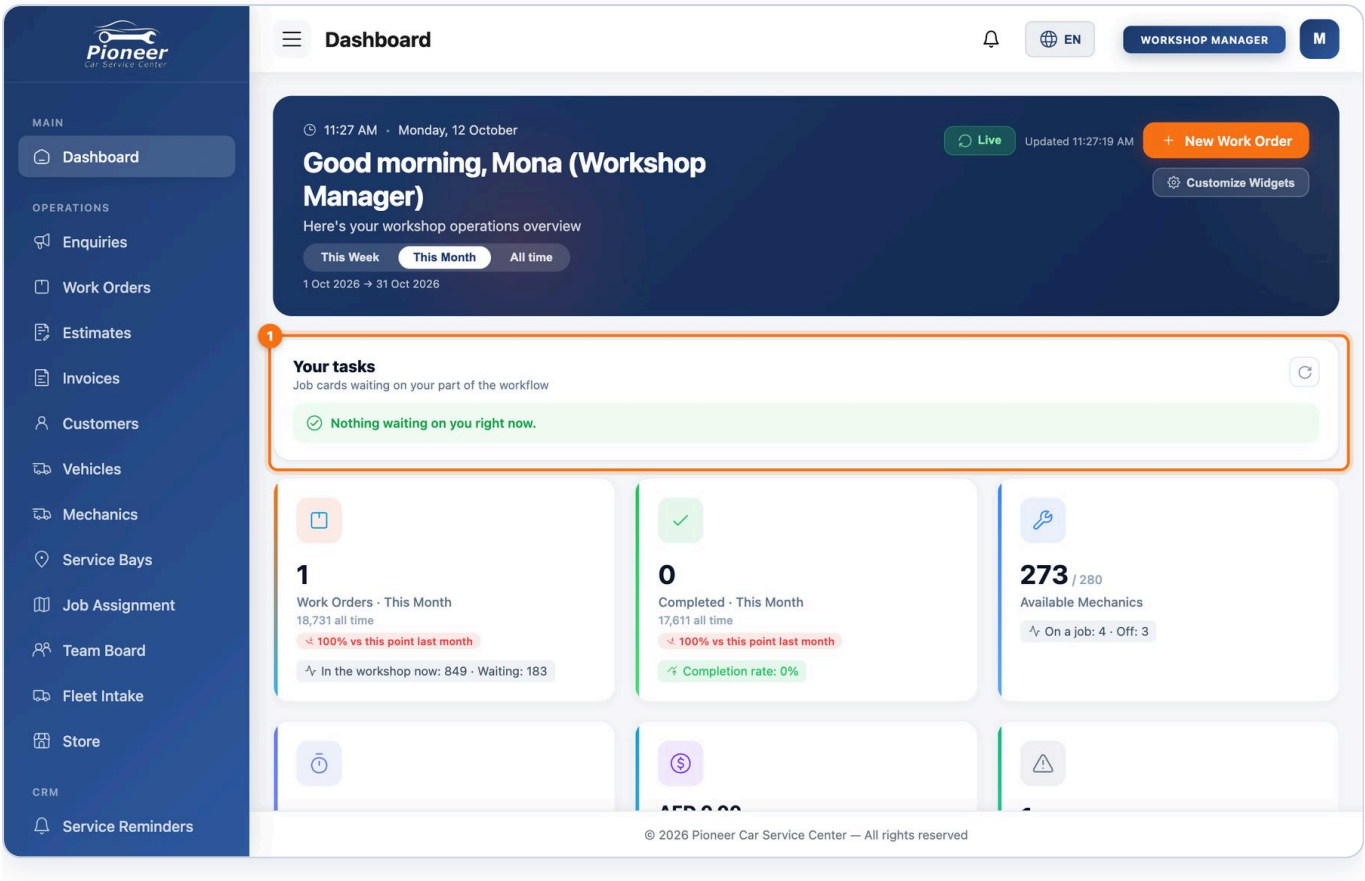

The sign-in page: (1) username or e-mail, (2) password, (3) Sign In.

TIP Use the **EN** button at the top of any page to switch language (Arabic and 10 others). Your choice is remembered on this device.

NOTE Your account is created by the Workshop Manager. Forgot your password? Use **FORGOT PASSWORD?** on the sign-in page or ask the manager to reset it.

2. Your dashboard

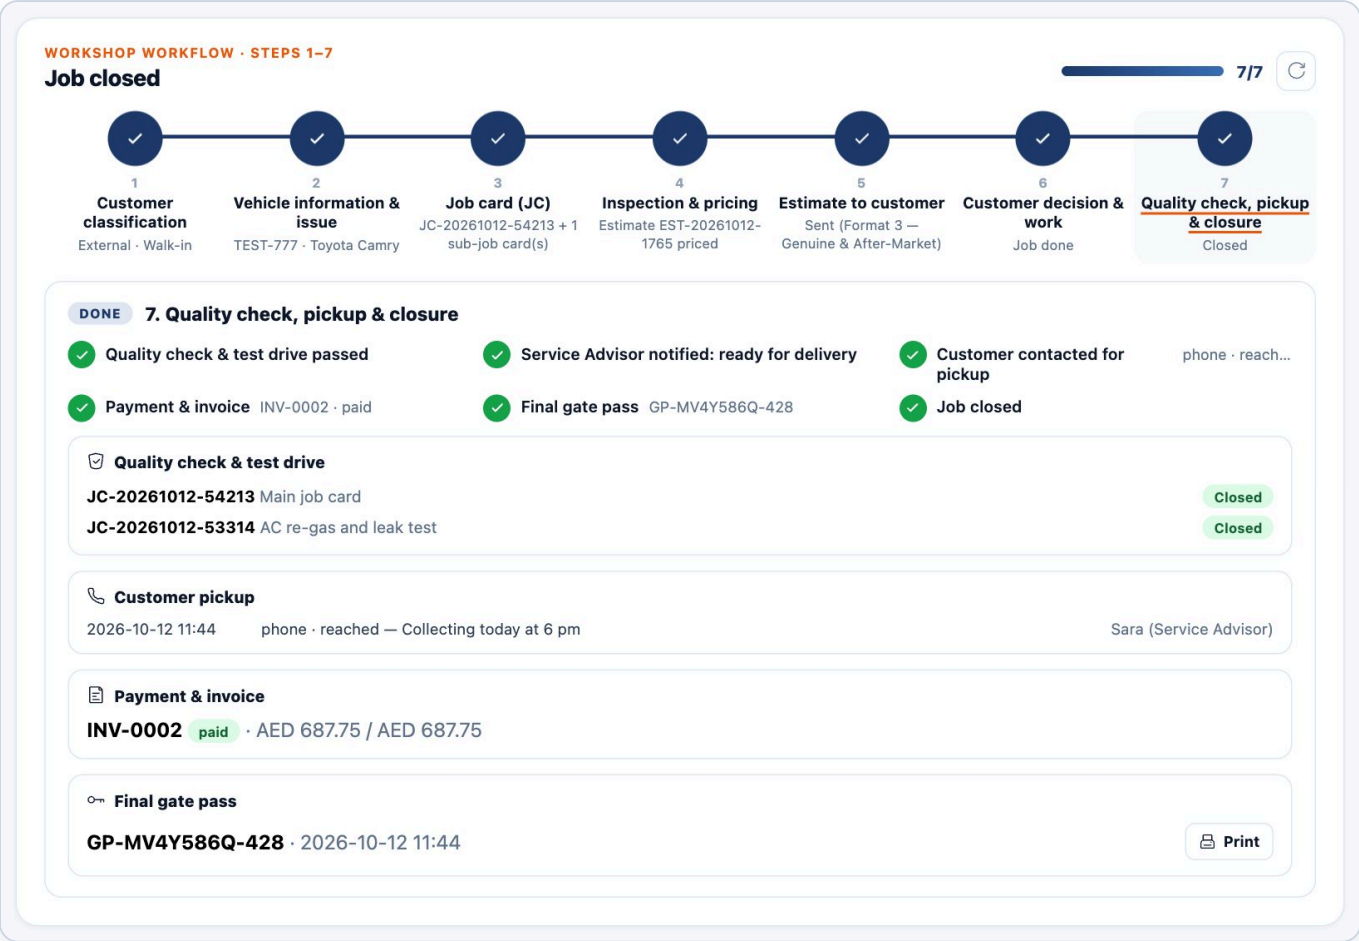

The manager dashboard — your tasks and workshop figures.

Your **Your tasks** card collects everything waiting at any step (parts to price, estimates to approve, assignments, quality checks, deliveries) because you can act on all of them.

3. Following a job through Steps 1–7

Open any job card to see the workflow panel: which steps are done, the current step and who acts next. The full walk-through for each step is in the role manuals; this is the overview.

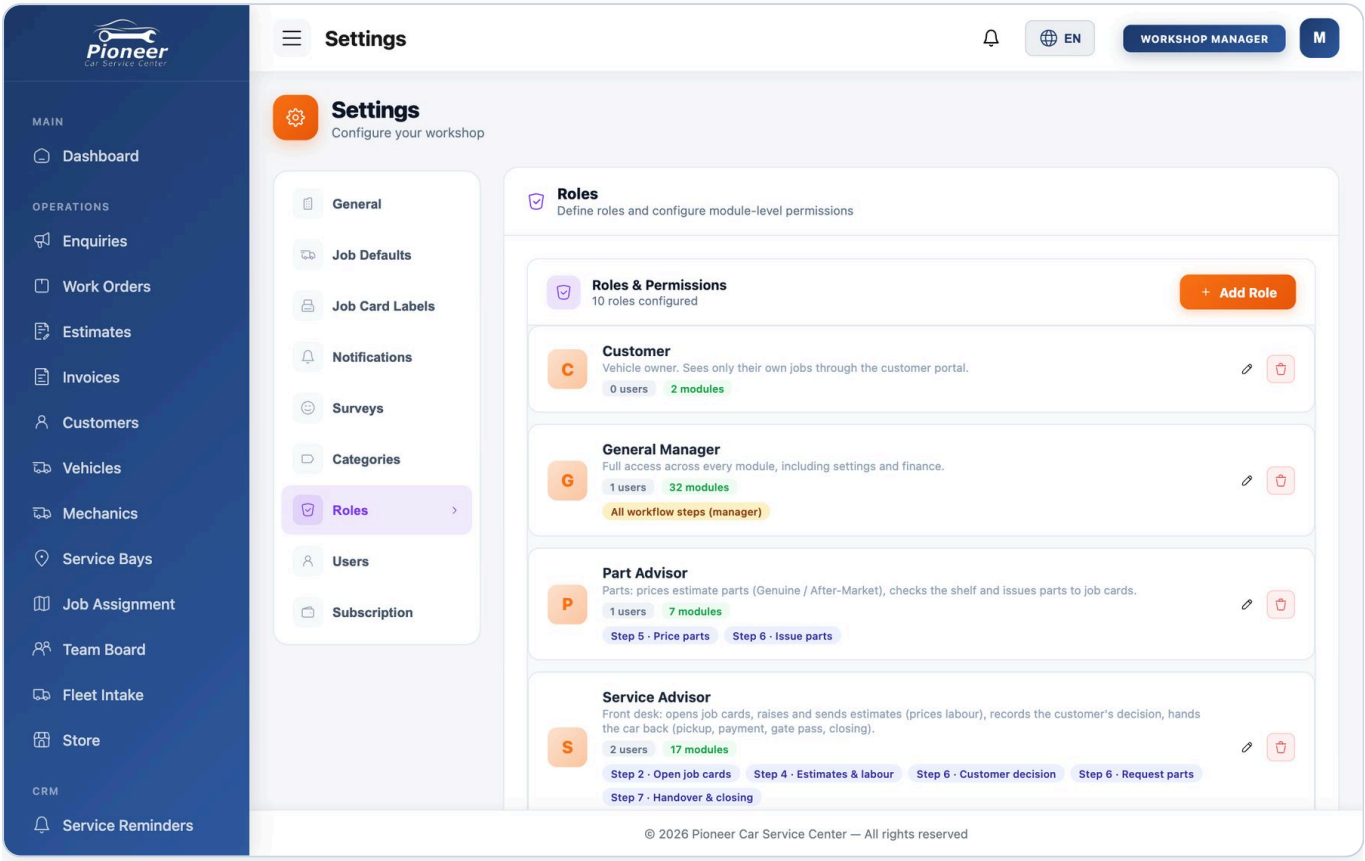

A completed job — all seven steps done.

Step	What happens	Who
1 · Customer classification	External (walk-in / fleet / insurer) or internal	Service Advisor
2 · Vehicle & issue	Vehicle, odometer and the complaint are recorded	Service Advisor
3 · Job card	The main job card opens automatically	System
4 · Inspection & pricing	Estimate raised; labour priced	Service Advisor
5 · Estimate to customer	Store prices parts; Supervisor approves (external); sent as Format 1/2/3	Store · Supervisor · Service Advisor
6 · Decision & work	Customer approves per line; technician assigned; time, parts, sub-job cards	Customer · Team Leader · Technician · Store

Step	What happens	Who
7 · QC & closure	3-point quality check, pickup call, payment, gate pass, closing	Supervisor · Service Advisor

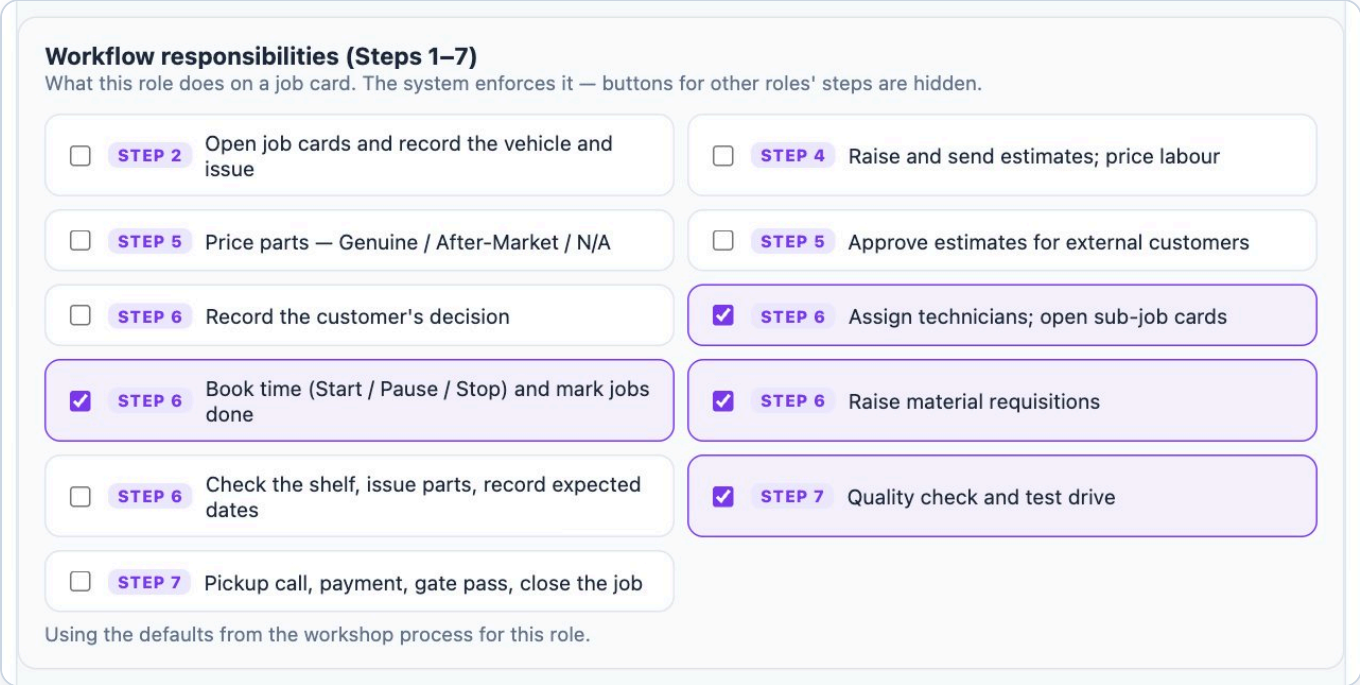

4. Roles and responsibilities (Settings → Roles)

Settings → Roles lists every role with its **workflow responsibilities** (the steps it may act on) and its **menu modules** (the screens it can open).

Settings → Roles: each role with its steps.

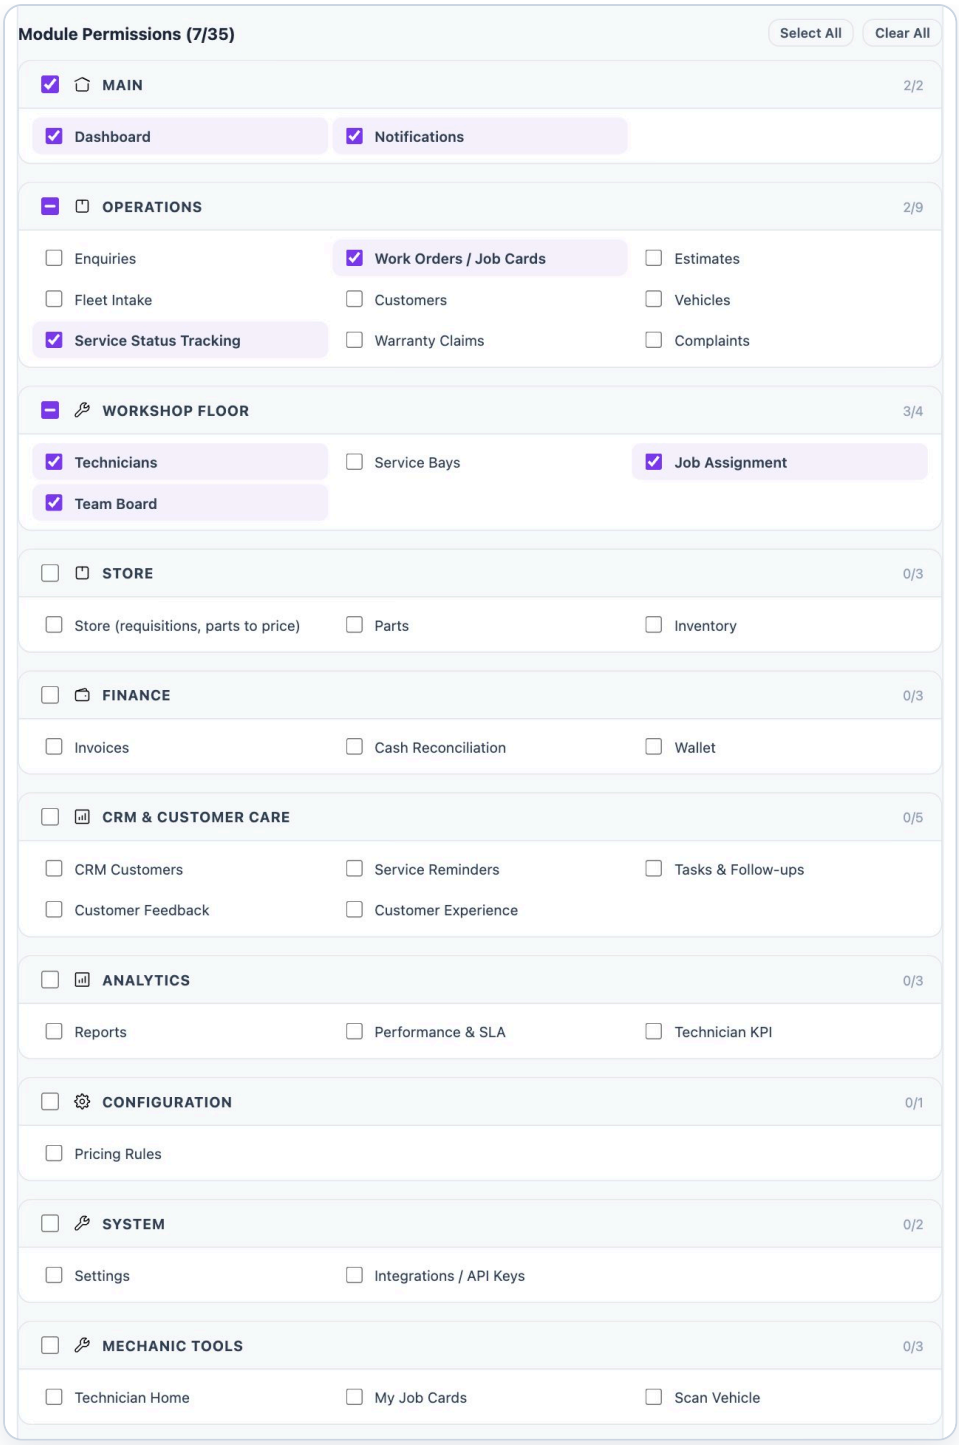

1. Click the pencil on a role to edit it.
2. Under **Workflow responsibilities**, tick what this role does on a job card. The system enforces it: buttons for unticked steps are hidden and the server refuses them.
3. Under **Module permissions**, tick the menu screens the role can open.
4. Press **Save Changes**. The server applies the new responsibilities straight away; users see their new menu and buttons when they reload the page or sign in again.

Workflow responsibilities for the Team Leader role.

TIP

A role that has not been changed shows "Using the defaults from the workshop process". Once you change it, **Reset to defaults** brings the defaults back. Managers always hold every responsibility.

Menu modules for the role.

NOTE

Add users under Settings → Users and give each one a role. A user's role decides their menu, their dashboard tasks and the buttons they see on a job card.

5. Default responsibilities

Responsibility	Step	Held by default
Open job cards and record the vehicle and issue	2	Service Advisor, Supervisor
Raise and send estimates; price labour	4	Service Advisor
Price parts — Genuine / After-Market / N/A	5	Storekeeper, Part Advisor
Approve estimates for external customers	5	Supervisor
Record the customer's decision	6	Service Advisor
Assign technicians; open sub-job cards	6	Team Leader, Supervisor, Workshop Foreman
Book time and mark jobs done	6	Technician, Team Leader, Supervisor, Workshop Foreman
Raise material requisitions	6	Technician, Team Leader, Supervisor, Foreman, Service Advisor
Check the shelf, issue parts, expected dates	6	Storekeeper, Part Advisor
Quality check and test drive	7	Supervisor, Workshop Foreman, Team Leader
Pickup call, payment, gate pass, close the job	7	Service Advisor

Managers (Workshop Manager, General Manager, owner, admin) hold all of them.
