PHASE 1 · Control the job, and put Pioneer on the phone

Input needed from you: Apple and Google developer accounts

Input needed from you: who leads which team

Today: the system records work but does not govern it

Customer approves the estimate, line by line

Job card opens only when approved

Team Leader assigns the technician

Start and end time booked per job

Technician starts, pauses, completes

Promotional app on iOS and Android - brand, services, offers, find and contact a branch

OUTCOME: nothing unapproved, one owner per car, and a channel we own

Which quality system?

Deferred, not dropped: booking, complaints and live job card status from the app. Each one needs customer sign-in, which the promotional app does not.

PHASE 2 · Close the loop

Parts requisition from approved lines

Quality check and road test

Gate pass gates the handover

Quality Coordinator role

OUTCOME: nothing leaves unchecked or unbilled

Vendor specs received?

PHASE 3 · Connect outward

Invoices pushed to ORBIT

WhatsApp updates to the customer

Punch clock feeds attendance

OUTCOME: one system, no re-keying
